Summer School Planning: Tips and Tools to Boost Learning

Summer school is critical time to advance student learning and address educational gaps. According to *ALIGNED LEARNING*, summer programming is considered to be the second most effective way to help students academically recover (behind high-intensity tutoring) from pandemic-related learning loss. (Dilbert and Schwartz, 2024)

We also recognize that recruiting teachers to take on summer school is incredibly challenging due to teacher burnout, staff shortages, and lack of instructional resources and support. Teachers are not the only difficult parties to recruit, according to survey from *The Hechinger Report* (August 2023), student participation rates in summer programming is often low with only with 5-23% (depending on district) enrolling.

So, we're faced with a challenging summer school mission: We must reinvent teaching and learning this summer with immersive experiences that are richer, more engaging, more authentic, and more rigorous. And we must recruit and equip staff to deliver those experiences while improving morale, not furthering burnout. It's a challenging task, to be sure, but also an exhilarating one. In the words of the X-Men's Professor Charles Xavier, "The process is slow, normally taking thousands and thousands of years. But every few hundred millennia, evolution leaps forward." Perhaps now is the time for education to finally leap forward in ways that make learning more meaningful, memorable, and fun!

“We must reinvent teaching and learning this summer with immersive experiences that are richer, more engaging, more authentic, and more rigorous.”
