 lecturers this book provides a comprehensive review of experimental space astronomy The number of astronomers whose
 knowledge and interest is concentrated on interpreting observations has grown substantially in the past decades yet the
 number of scientists who are familiar with and capable of dealing with instrumentation has dwindled All of the authors of this
 work are leading and experienced experts and practitioners who have designed built tested calibrated launched and operated
 advanced observing equipment for space astronomy This book also contains concise information on the history of the field
 supported by appropriate references Moreover scientists working in other fields will be able to get a quick overview of the
 salient issues of observing photons in any one of the various energy wavelength and frequency ranges accessible in space
