The Voice Of Liberal Learning Michael Oakeshott On Education:

The Voice of Liberal Learning Michael Oakeshott, 2001 To those weary and wary of the cacophony about what's wrong with education in America and what ought to be done about it Oakeshott's voice beckons As usual his approach to the subject is subtle comprehensive and radical in the sense of summoning readers to the root of the matter That root Oakeshott believed is the very nature of learning itself and concomitantly the means as distinct from the method by which the life of learning is discovered cultivated and pursued As Oakeshott has written This then is what we are concerned with adventures in human self understanding Not the bare protestation that a human being is a self conscious reflective intelligence and that he does not live by bread alone but the actual enquiries utterances and actions in which human beings have expressed their understanding of the human condition This is the stuff of what has come to be called a liberal education liberal because it is liberated from the distracting business of satisfying contingent wants Includes a foreword by Timothy Fuller that reiterates the timelessness of Oakeshott's reflections amid the continuing clamour that characterises discourse about liberal education

The Voice of Liberal Learning Michael Oakeshott, 1989 The voice of liberal learning M. Oakeshott, 1990 *Michael Oakeshott Selected Writings Collection* Michael Oakeshott, 2014-08-26 A collection of 6 volumes of Oakeshott's work Notebooks 1922-86 Early Political Writings 1925-30 The Concept of a Philosophical Jurisprudence Vocabulary of a Modern European State Lectures in the History of Political Thought and What is History Liberal Education and Democracy Bob Pepperman Taylor, 2025-05-15 Liberal Education and Democracy addresses three vital arguments for liberal education and its integral relationship to democracy Liberal education is currently under attack as both politically subversive and economically impractical In Liberal Education and Democracy Bob Pepperman Taylor evaluates both the defenses that have been offered for liberal education and the complex relationship between liberal education and democracy He offers a compelling case for maintaining a strong commitment to this form of education as an essential good for all citizens His three primary arguments for liberal education are that it prepares students to be useful contributors to the economy that it prepares citizens to be thoughtful and responsible and that it can stimulate students to experience the delight of intellectual exploration and understanding Taylor moves through each of these arguments and concludes that the seemingly least practical of them may in fact be the most powerful He gives an insightful glimpse into the current democratic climate and through thorough examination argues that democracies need liberal education as much as liberal learning requires the freedom of democratic societies *Educational Theory and Jewish Studies in Conversation* Harvey Shapiro, 2013 *Educational Theory and Jewish Studies in Conversation* From Volozhin to Buczac by Harvey Shapiro PhD brings together two different fields of study modern Jewish studies and contemporary educational theory to provide new theoretical frameworks for their interaction Although Jewish studies and education programs at secular universities have joined denominational and transdenominational institutions of higher learning in adopting a dual or parallel course structure there

has been little scholarly attention given to the basis for doing so Shapiro provides alternative theoretical frameworks for the relationship between Jewish studies and educational theory and discusses different ways of developing and articulating these relationships between disciplines Shapiro shows what is at stake when students and faculty think and communicate together across discourses in particular between the fields of education and Jewish studies Presenting an alternative to conventional notions of interdisciplinarity this book's import extends to virtually all relationships between the humanities and professional education when these different discourses illuminate and challenge one another

Education as a Human Right Tristan McCowan, 2013-04-25 Education is widely recognized as a fundamental human right yet the nature of the right remains unclear Is it an entitlement to go to school to acquire particular forms of knowledge or develop particular skills or attributes And why exactly is education so important that we might defend all people's right to it This book provides a much needed exploration of this key contemporary issue Highlighting limitations in the approaches of both the Education for All initiative and existing international law the book presents a radical new vision of how the right can be understood As well as basic education there are discussions of higher and lifelong education of human rights education and of the intersection of rights based approaches with others such as Amartya Sen's capabilities The work serves as a stirring defense of the universal right to education against instrumental conceptions of learning the inactivity of national governments and the abrogation of responsibility of the international community

Mediumism René Vincente Arcilla,2011-01-02 Mediumism considers what the modernist movement in the arts could mean for us today It examines how artists and critics particularly in the visual arts responded to the growth of industries of distraction since the nineteenth century by creating new kinds of artworks that stress their mediums Ren V Arcilla draws out the metaphysical and ethical implications of the work of critics Clement Greenberg T J Clark and Michael Fried from a perspective rooted in existentialism He finds in the resulting moral orientation a way to understand the distinctive purpose of liberal education and its political resistance to consumerism Eschewing terminology that would be familiar to only one set of specialists the book aims to be accessible to a general audience as well as to readers interested in modernist art cultural politics existentialist philosophy and the philosophical principles of liberal education

Unlocking the World Claudia W. Ruitenberg,2015-12-03 Unlocking the World proposes hospitality as a guiding ethic for education Based on the work of Jacques Derrida it suggests that giving place to children and newcomers is at the heart of education The primary responsibility of the host is not to assimilate newcomers into tradition but rather to create or leave a

place where they may arrive Hospitality as a guiding ethic for education is discussed in its many facets including the decentered conception of subjectivity on which it relies the way it casts the relation between teacher and student and its conception of curriculum as an inheritance that asks for a critical reception The book examines the relation between an ethic of hospitality and the educational contexts in which it would guide practice Since these contexts are marked by gender culture and language it asks how such differences affect enactments of hospitality Since hospitality typically involves a power difference between host and guest the book addresses how an ethic of hospitality accounts for power whether it is appropriate for educational contexts marked by colonialism and how it might guide education aimed at social justice
