Infrastructure Aesthetics Solveig Daugaard,Cecilie Ullerup Schmidt,Frederik Tygstrup,2024-11-04 An upsurge in artworks negotiating the conditions of their own production distribution and reception has called attention to the infrastructural relations that shape the art world but have long been understudied In response this book introduces the concept of infrastructure aesthetics into the study of culture The concept is drawn from infrastructure studies media theory and aesthetic theory This volume develops it further addressing the analytical challenge of working with works that blur the boundaries between art and infrastructure both

historically and in the present the aesthetic problem of assessing artistic forms that operate on an infrastructural level and the politics of artistic agency on a social level beyond the work's content or message. As the relation between artworks and their institutional and social settings becomes infrastructural in nature, we need to move beyond the reductive division of the study of artworks into production, articulation, and reception. This book provides its readers with an innovative conceptual toolbox designed for precisely this task, as well as a forceful set of exemplary case studies applying the concepts in theory and practice.

Inhabiting Utopia: Science Fiction in Film, Performing Arts, and Digital Media Aparajita Nanda, Lucia-Mihaela Grosu-Rădulescu, 2025-11-01

This volume contributes to research in both humanities and performing arts without disregarding the more recent digital artistic media by focusing on works of science fiction (Sci-Fi). The book's structure mirrors the themes approached in an effort to contextualize the Atwoodian concept of utopia by addressing a variety of topical subjects such as transhumanism, ethical dilemmas, subjectivities in a digital world, in science fiction, theater, opera, and art installations, as well as film and new digital media. The book collects interpretations of transmedial performances, comparisons of films and novels, videogames, and other immersive platforms. The contributors include a range of academics and specialists from Japan, Romania, India, Spain, Ireland, and the U.S.A. Recent preoccupations with Artificial Intelligence and its advantages and threats have also meant a re-assessment of Sci-Fi creations and their relevance. The book appeals to students and researchers in the humanities, media studies, performance arts, as well as larger audiences interested in comparative and analytic discussions of Sci-Fi works anchored in real-life concerns.
