Triaging the Streaming Wars Robert Alan Brookey, Jason Phillips, Tim Pollard, 2023-09-08. This volume considers the different implications of the rise of streaming services and their particular acceleration during the COVID 19 pandemic. Exploring the significant disruption caused to the entertainment industries by the rise of these streaming services, a team of international scholars examine changes to labor issues and compensation which were central to the conflict between the Writers Guild of America members and their agents, the broadening divide between networks and affiliates, the significant consolidation of the media industry resulting from Disney's acquisition of Fox ahead of the launch of Disney+, and the variety of business models behind these services that defy the traditional advertising models and standard revenue streams. Practical Theatre Sally Mackey, 1997. Practical Theatre meets the requirements of the A level theatre studies performing arts syllabuses and GNVQ performing arts. It seeks to encourage practical quality work by providing a rigorous framework of knowledge. From Betamax to Blockbuster Joshua M. Greenberg, 2010-09-24. How the VCR was transformed from a machine that records television into a medium for movies. The first video cassette recorders were promoted in the 1970s as an extension of broadcast television technology, a time shifting device, a way to tape TV shows. Early advertising for Sony's Betamax told potential purchasers: "You don't have to miss Kojak because you're watching Columbo." But within a few years, the VCR had been transformed from a machine that recorded television into an extension of the movie theater into the home. This was less a physical transformation than a change in perception, but one that relied on the very tangible construction of a network of social institutions to support this new marketplace for movies. In *From Betamax to Blockbuster*, Joshua Greenberg explains how the combination of neighborhood video stores and the VCR created a world in which movies became tangible consumer goods. Greenberg charts a trajectory from early videophile communities to the rise of the video store, complete with theater marquee lights, movie posters, popcorn, and clerks who offered expert advice on which movies to rent. The result was more than a new industry; by placing movies on cassette in the hands and control of consumers, video rental and sale led to a renegotiation of the boundary between medium and message and ultimately a new relationship between audiences and movies. Eventually, Blockbuster's top-down franchise store model crowded local video stores out of the market, but the recent rise of Netflix, iTunes, and other technologies have reopened old questions about what a movie is.

and how and where it ought to be watched By focusing on the spaces in between manufacturers and consumers Greenberg s account offers a fresh perspective on consumer technology illustrating how the initial transformation of movies from experience into commodity began not from the top down or the bottom up but from the middle of the burgeoning industry out
