Weaver, 2020-12-11 In June 1965 the National Cowboy Hall of Fame and Western Heritage Center as it was then named owned a mere handful of artifacts In fact

the Oklahoma City institution was forced to borrow materials in order to mount exhibitions to support its inaugural events. From that modest beginning the center now known as the National Cowboy and Western Heritage Museum has grown into perhaps the world's most respected repository for the study and understanding of the diverse cultures of the American West. But as Bobby D. Weaver demonstrates in this no-holds-barred history, the path from those humble origins to the esteemed position the museum occupies today led through some rough and tumble times, including a period of receivership. The autocratic style of the founding director coupled with certain early less-than-ethical practices forced the museum into what Weaver delicately terms a legal tangle that required a complete organizational and financial overhaul. With renewed professional leadership and the steadfast support of dedicated patrons and sponsors, the National Cowboy and Western Heritage Museum has developed and changed along with evolving understandings of the culture it was founded to celebrate. What was once a shrine to a particular manifestation of American frontier life has transformed into a world-class art and historical museum that represents the broad sweep of the American West, both lived and imagined, with its full range of social, ethnic, and economic diversity. As Weaver relates, today's institution is well poised for the future as it furthers its mission of preserving and interpreting the heritage of a vital American region and its lifeways.

The Origins of World War I

Richard F. Hamilton, Holger H. Herwig, 2003-02-24. This work poses a straightforward yet at the same time perplexing question about World War I: Why did it happen? Several of the oft-cited causes are reviewed and discussed. The argument of the alliance systems is inadequate, lacking relevance or compelling force. The arguments of mass demands, those focusing on nationalism, militarism, and social Darwinism, it is argued, are insufficient, lacking indications of frequency, intensity, and process, how they influenced the various decisions. The work focuses on decision making on the choices made by small coteries in Austria, Hungary, Germany, Russia, France, Britain, and elsewhere. The decisions made later by leaders in Japan, the Ottoman Empire, Italy, the Balkans, and the United States are also explored. The final chapters review the basic causes once again. An alternative position is advanced, one focused on elites and coteries, their backgrounds and training, and on their unique agendas.
