Performance and the Disney Theme Park Experience Jennifer A. Kokai, Tom Robson, 2025-07-02 Most scholars and critics deny agency to the tourist in their engagement with the Disney theme park experience The vast body of research and journalism on the Disney Imagineers the designers and storytellers who construct the park experience leads to the misconception that these exceptional artists puppeteer every aspect of the guest s experience This anthology now in its second edition re centers the park experience around its protagonist the tourist and addresses the Disney Parks using performance theory an approach few to no scholars had used prior to the first edition The authors of the individual essays as well as the Introduction by Kokai and Robson and an Afterword by world renowned tourism and performance expert Susan Bennett recognize the inherently complicated nature of Disney Many of the contributors consider themselves Disney fans but also recognize the potentially problematic aspects of Disney parks This collection permits both perspectives to exist side by side informing rather than contradicting each other

Hai Ren,2010-10-04 This book examines the period leading up to the Hong Kong handover in 1997 the countdown of time and by using iconic cultural symbols such as the countdown clock the Hong Kong Museum exhibitions and cultural heritage sites argues that China has undergone a transition to neoliberal state in part through its reunification with Hong Kong The problem of synchronization with the world a Chinese phrase that epitomizes China s engagement with modern capitalism since the first Opium War was characterized throughout the 20th century as a humiliation weakness tragedy and disaster with China in the role of the victim of capitalist globalization During the reunification with Hong Kong these conventional expressions were replaced by new ones such as de humiliation return self esteem and revival Hai Ren gives an

ethnographic and historical analysis of this cultural and political transformation of China's globalization experience by looking closely at public history practices in mainland China and Hong Kong and how the reconfiguration of everyday life and cultural norms led to the development of this neoliberal China. As a book which straddles Chinese and Hong Kong history, politics, cultural heritage and museum studies more generally, it can be regarded as a work of cultural political economy which will appeal to students and scholars of all of the above.

Playing the Field Sascha Pöhlmann, 2019-08-19 American Studies has only gradually turned its attention to video games in the twenty first century even though the medium has grown into a cultural industry that is arguably the most important force in American and global popular culture today. There is an urgent need for a substantial theoretical reflection on how the field and its object of study relate to each other. This anthology, the first of its kind, seeks to address this need by asking a dialectic question: first, how may American Studies apply its highly diverse theoretical and methodological tools to the analysis of video games; and second, how are these theories and methods in turn affected by the games. The eighteen essays offer exemplary approaches to video games from the perspective of American cultural and historical studies as they consider a broad variety of topics: the US American games industry, Puritan rhetoric, cultural geography, mobility and race, urbanity and space, digital sports, ludic textuality, survival horror and the eighteenth century novel, gamer culture and neoliberalism, terrorism and agency, algorithm culture, glitches, theme parks, historical guilt, visual art, sonic meaning making and nonverbal gameplay.

Making Bourbon Karl Raitz, 2020-03-17 Raitz examines the rich story of distilling in its Kentucky heartland and traces its maturation from a local craft to an enduring industry. William Wyckoff, author of *How to Read the American West*. While other industries chase after the new and improved, bourbon makers celebrate traditions that harken back to an authentic frontier craft. Distillers enshrine local history in their branding and time tested recipes and rightfully so. Kentucky's unique geography shaped the whiskeys its settlers produced and for more than two centuries distilling bourbon fundamentally altered every aspect of Kentucky's landscape and culture. *Making Bourbon: A Geographical History of Distilling in Nineteenth Century Kentucky* illuminates how the specific geography, culture and ecology of the Bluegrass converged and gave birth to Kentucky's favorite barrel aged whiskey. Expanding on his fall 2019 release *Bourbon's Backroads*, Karl Raitz delivers a more nuanced discussion of bourbon's evolution by contrasting the fates of two distilleries in Scott and Nelson Counties. In the nineteenth century distilling changed from an artisanal craft practiced by farmers and millers to a large scale mechanized industry. The resulting infrastructure—farms, mills, turnpikes, railroads, steamboats, lumberyards and cooperage shops—left its permanent mark on the land and traditions of the commonwealth. Today multinational brands emphasize and even construct this local heritage. This unique interdisciplinary study uncovers the complex history poured into every glass of bourbon. A gem. The depth of Raitz's research and the breadth of his analysis have produced a masterful telling of the shift from craft to industrial distilling. And in telling us the story of bourbon, Raitz also makes a terrific contribution to our understanding of America's nineteenth century economy. David E.

Hamilton author of *From New Day to New Deal* *The Real Fake* Maria Francesca Piazzoni, 2018-10-30 Thames Town an English like village built in Shanghai is many places at once a successful tourist destination an affluent residential cluster a city of migrant workers and a ghost town *The Real Fake* explores how the users of Thames Town transform a themed space into something more than a fake place Piazzoni understands authenticity as a dynamic relationship between people places and meanings that enables urban transformations She argues that authenticity underlies the social and physical production of space through both top down and bottom up dynamics The systems of moral and aesthetic judgments that people associate with the authentic materialize in Thames Town Authenticity excludes some users as it inhibits access and usage especially to the migrant poor And yet ideas of the authentic also encourage everyday spontaneous appropriations of space that break the village's staged atmosphere Most scholars criticize theming by arguing that it produces a fake controlling city Piazzoni complicates this view by demonstrating that although the exclusionary character of theming remains unquestionable it is precisely the experience of fakeness that allows Thames Town's users to develop a sense of place Authenticity the ways people construct and spatialize its meanings intervenes holistically in the making and remaking of space Native Tours Erve Chambers, 2019-06-20 Previous editions of *Native Tours* provided a much needed overview and analysis of anthropology's contributions to tourism as an emerging field of study Such a cultural perspective illuminated key ideas surrounding worldwide host guest relations and informed discussions of political and economic influences and the impacts both negative and positive of tourism as one of the world's largest industries Applying a characteristically uncluttered authoritative writing style alongside an exceptional command of the relevant literature Chambers updates refines and extends his earlier work He retains a focus on the social cultural economic and environmental consequences of tourism and provides a framework for understanding tourism initiatives in their particular circumstances Three detailed case studies originating in the American Southwest the Tirolean Alps and Belize illustrate the varied costs and benefits of tourism
