Global South the role of religion is highly pervasive the distinctive conclusion of this book is therefore that a lessening of religiosity is a sine qua non for growth and development including secular laws and constitutions Offering a ground breaking study in an area little explored in the English language this book will satisfy an important gap in the literature on the political economy of development sociology of religion law and anthropology Excellence vs. Equality Allan C. Ornstein,2015-11-06 Excellence vs Equality Can Society Achieve Both Goals explores the issues faced by societies attempting to preserve democratic ideals and the common good in an era of incommensurate wealth and opportunity As differences in advantage and ability affect the relationships between institutions and the people who comprise them the book argues that political and social compromise is needed to prevent economic inequality from threatening the well being and mobility of the less able and less fortunate Topics include globalization technology innovation talent and meritocracy higher education big business labor unions and social justice within educational and workplace settings The author raises perennial and ever prescient questions regarding how to balance excellence and equality and how to reduce inequality around the world **Handbook of the Geographies of Religion** Lily Kong,Orlando Woods,Justin K.H. Feagin,2016-04-14 Racial Theories

in Social Science A Systemic Racism Critique provides a critique of the white racial framing and lack of systemic racism analysis prevalent in past and present mainstream race theory As this book demonstrates mainstream racial analysis and social analysis more generally remain stunted and uncritical because of this unhealthy white framing of knowledge and evasion or downplaying of institutional structural and systemic racism In response to ineffective social science analyses of racial matters this book presents a counter approach systemic racism theory The foundation of this theoretical perspective lies in the critical insights and perspectives of African Americans and other people of color who have long challenged biased white framed perspectives and practices and the racially oppressive and exclusionary institutions and social systems created by whites over several centuries

Beyond the Triple Bottom Line Francisco Szekely, Zahir Dossa, 2024-08-06 A pragmatic new business model for sustainability that outlines eight steps that range from exploring a mission to promoting innovation with case studies. Many recent books make the case for businesses to become more sustainable but few explain the specifics. In this book Francisco Szekely and Zahir Dossa offer a pragmatic new business model for sustainability that extends beyond the traditional framework of the triple bottom line, describing eight steps that range from exploring a vision and establishing a strategy to implementing the strategy and promoting innovation. Szekely and Dossa argue that businesses and organizations need to move away from the business case for sustainability toward a sustainable business model. That is, businesses should go beyond the usual short-term focus on minimizing harm while maximizing profits. Instead, businesses on the path to sustainability should from the start focus on addressing a societal need and view profitability not as an end but as a means to support the sustainable organization. Szekely and Dossa explore key problems organizations face when pursuing a sustainability agenda. Each chapter presents one of the eight steps, describes a business dilemma for sustainability, provides a theoretically grounded strategic framework, offers case studies that illustrate the dilemma, and summarizes key findings. The case studies draw on the experiences of such companies as Tesla Motors, Patagonia, TOMS, and Panera. The book emphasizes leadership, arguing that leaders who question the status quo, inspire others, and take risks are essential for achieving sustainable business practices.

American Black Women and Interpersonal Leadership Styles Claretha Hughes, 2015-01-19 American Black women bring different interpersonal leadership styles to Fortune and non-Fortune 500 organizations. Their interpersonal leadership styles are developed at home within their community through their educational experiences and within society. They bring unique perspectives to the workplace. Organizations that recognize respect and value their different viewpoints have leaders who are contributing to the financial growth of their organizations. American Black women have career capital to offer to organizations through their self-efficacy, emotional intelligence, and the leadership strategies that they understand and apply in the workplace. In addition, they bring high educational achievement, practical skills, and analytical abilities that are useful when leading others. They bring a persistent work ethic, support for education and leadership development, and an enduring spirit of cooperation in the midst of undeserved personal challenges to the workplace. They solve problems, help others succeed, enhance the workplace environment and organization culture, and help their organizations maintain competitive advantage in an evolving global economy. Executive leadership should lead the effort to enhance the role of American Black women within their organizations. Change begins at the top, and integrating American Black women into executive leadership roles is a change initiative that must be strategically developed and managed through understanding who they are. This book

provides a foundation upon which individuals and organizations can begin the change initiative through the use of the Five Values model as a career management system for developing and enhancing the careers of American Black women who are leading within and want to lead organizations

Dream Factories Ken S. Coates,Bill Morrison,2016-05-14 Two professors look at the mystique around universities and the consequences of credentialism For decades we have promoted the idea that a university degree is a passport to future career success Ken Coates and Bill Morrison argue that the over promotion of higher education and university degrees is actually undermining the lives of young people saddling them with enormous debts and costing governments huge amounts of money As the young flock to universities in ever increasing numbers fewer of them than ever find the elusive good jobs that they are pursuing In fact many of those jobs no longer exist We are in the midst of a youth employment crisis that is global in proportion and we are facing serious misunderstandings about the unfolding career prospects for young adults entering a world of rapid technological change Ken Coates and Bill Morrison explore the impacts of universities turning out graduates with the wrong skills and the consequences of vanishing job opportunities

Sub-Saharan African Immigrants' Stories of Resilience and Courage Mariam Konate,Fredah Mainah,2022-12-06 The purpose of this book is to give a voice to nameless and countless stories that represent the personal lived experiences of sub Saharan African immigrants in the United States The authors believe that telling our own stories from our own perspectives is important and empowering because when others tell our stories there are omissions and misrepresentations and a lot of stereotyping The authors hope that the insights gained from the research in this book will be used by immigrant communities academic institutions and governmental agencies in advocating for immigration policies that positively impact the lived experiences of sub Saharan African immigrants and in planning support interventions

The Way Back F. H. Buckley,2017-11-07 The promise of America is that with ambition and hard work anyone can rise to the top But now the promise has been broken and we ve become an aristocracy where rich parents raise rich kids and poor parents raise poor kids We ve been told that the changes are structural that there s nothing we can do about this But that doesn t explain why other First World countries are beating us hands down on the issue of mobility What s different about America is our politics An ostensibly progressive New Class of comfortably rich professionals media leaders and academics has shaped the contours of American politics and given us a country of fixed economic classes It is supported by the poorest of Americans who have little chance to rise an alliance of both ends against the middle that recalls the Red Tories of parliamentary countries Because they support an aristocracy the members of the New Class are Tories and because of their feigned concern for the poor they are Red Tories *The Way Back* explains the revolution in American politics where political insurgents have challenged the complacent establishment of both parties and shows how we can restore the promise of economic mobility and equality by pursuing socialist ends through capitalist means
