Synthetic Aperture Radar Processing Giorgio Franceschetti,Riccardo Lanari,2018-02-06 Synthetic Aperture Radar Processing simply and methodically presents principles and techniques of Synthetic Aperture Radar SAR image generation by analyzing its system transfer function The text considers the full array of operation modes from strip to scan emphasizes processing techniques enabling the design of operational SAR codes A simple example then follows This book will be invaluable to all SAR scientists and engineers working in the field It may be used as the basis for a course on SAR image generation or as a reference book on remote sensing It contains a wide spectrum of information presented with clarity and rigor Variation in Indonesian Sign Language Nick Palfreyman,2019-01-29 This pioneering work on Indonesian Sign Language BISINDO explores the linguistic and social factors that lie behind variation in the grammatical domains of negation and completion Using a corpus of spontaneous data from signers in the cities of Solo and Makassar Palfreyman applies an innovative blend of methods from sign language typology and Variationist Sociolinguistics with findings that have important implications for our understanding of grammaticalisation in sign languages The book will be of interest to linguists and sociolinguists including those without prior experience of sign language research and to all who are curious about the history of Indonesia s urban sign community Nick Palfreyman is a Leverhulme Early Career Research Fellow at the International Institute for Sign Languages and Deaf Studies iSLanDS University of Central Lancashire *SignGram Blueprint* Josep Quer,Carlo Cecchetto,Caterina Donati,Carlo Geraci,Meltem Kelepir,Roland Pfau,Markus Steinbach,2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity **A Matter of Complexity** Roland Pfau,Markus Steinbach,Annika Herrmann,2016-03-07 Since natural languages exist in two different modalities the visual gestural modality of sign languages and the auditory oral modality of spoken languages it is obvious that

all fields of research in modern linguistics will benefit from research on sign languages Although previous studies have provided important insights into a wide range of phenomena of sign languages there are still many aspects of sign languages that have not yet been investigated thoroughly The structure of subordinated clauses is a case in point The study of these complex syntactic structures in the visual gestural modality adds to our understanding of linguistic variation in the domain of subordination Moreover it offers new empirical and theoretical evidence concerning possible structures and functions of subordination in natural languages And last but not least it answers the question to what extent the corresponding morphosyntactic and prosodic strategies depend on the modality of articulation and perception This volume represents the first collection of papers by leading experts in the field investigating topics that go beyond the analysis of simple clauses It thus contributes in innovative ways to recent debates about syntax prosody semantics discourse structure and information structure and their complex interrelation

Optimal Design and Control Jeff Borggaard, John Burkhardt, Max Gunzburger, Janet Peterson, 2012-12-06 This volume is the proceedings of the Workshop on Optimal Design and Control that was held in Blacksburg Virginia April 8 9 1994 The workshop was sponsored by the Air Force Office of Scientific Research through the Air Force Center for Optimal Design and Control CODAC at Virginia Tech The workshop was a gathering of engineers and mathematicians actively involved in innovative research in control and optimization with emphasis placed on problems governed by partial differential equations The interdisciplinary nature of the workshop and the wide range of subdisciplines represented by the participants enabled an exchange of valuable information and also led to significant discussions about multidisciplinary optimization issues One of the goals of the workshop was to include laboratory industrial and academic researchers so that analyses algorithms implementations and applications could all be well represented in the talks this interdisciplinary nature is reflected in these proceedings An overriding impression that can be gleaned from the papers in this volume is the complexity of problems addressed by not only those authors engaged in applications but also by those engaged in algorithmic development and even mathematical analyses Thus in many instances systematic approaches using fully nonlinear constraint equations are routinely used to solve control and optimization problems in some cases replacing ad hoc or empirically based procedures

Weather Architecture Jonathan Hill, 2013-06-17 Weather Architecture further extends Jonathan Hill's investigation of authorship by recognising the creativity of the weather At a time when environmental awareness is of growing relevance the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design construction and use in a creative dialogue with other authors such as the architect and user Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together Rather than investigate architecture's relations to the weather in isolation they are integrated into a wider discussion of cultural and social influences on architecture The analysis of weather's effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of

changing attitudes to the weather in the arts sciences and society leading to a critical re evaluation of contemporary responses to climate change **Signed Language and Gesture Research in Cognitive Linguistics** Terry Janzen,Barbara Shaffer,2023-07-24 This volume represents the first time that researchers on signed language and gesture have come together with a coherent focus under the framework of cognitive linguistics The pioneering work of Sherman Wilcox is highlighted throughout scaffolding much of the research of these contributors The five sections of the volume reflect critical areas of Dr Wilcox s own research in cognitive linguistics Guiding research principles in signed language gesture and cognitive linguistics iconicity across signed and spoken linguistics multimodality blending depiction and metaphor in signed languages and specific grammatical constructions as form meaning pairings The authors of this volume exemplify and continue Dr Wilcox s work of bridging signed and spoken language disciplines by contributing chapters that represent a multiplicity of perspectives on signed spoken and gesture data This volume presents a unified collection of cognitive linguistics research by leading authors that will be of interest to readers in the fields of signed and spoken language linguistics gesture studies and general linguistics **Current Directions in Turkish Sign Language Research** Engin Arik,2014-07-18 This book aims to contribute to our knowledge of Turkish Sign Language T D and sign language linguistics in general T D is a relatively old signed language and is at present believed to be historically unrelated to other signed languages Linguistic studies on this language started in the early 2000s There has been growing academic interest and an increasing body of work on T D within the past decade enhancing the need for this this book which brings together chapters covering a variety of topics such as the history of deaf education and T D issues regarding language documentation a phonological study of fingerspelling reciprocals interrogatives reported utterances expressions of spatial relations including their acquisitions and expressions of multiple entities This book was supported in part by the T B TAK Research Fund Project No 111K314 This edited volume serves as a useful resource for newcomers to the field gives new momentum to future research on T D and offers unique perspectives in investigating sign languages in general Finally the intention is that the conversations within this volume will open up new discussions not only within sign linguistics but also in other related fields such as cognitive science Object Oriented Methods for Interoperable Scientific and Engineering Computing Michael E. Henderson,Christopher Radcliff Anderson,Stephen L. Lyons,1999-01-01 Contains papers presented at the October 1998 SIAM Workshop on Object Oriented Methods for Interoperable Scientific and Engineering Computing that covered a variety of topics and issues related to designing and implementing computational tools for science and engineering **Principles of Decoration in the Roman World** Annette Haug,M. Taylor Lauritsen,2021-04-19 This book explores the manner in which architectural settings and action contexts influenced the perception of decoration in the Roman world Crucial to the relationship between ancient viewers and media was the concept of decor a term employed by Vitruvius and other Roman authors to describe the appropriateness of particular decorative elements to the environment in which they were located The

papers in this volume examine a diverse range of decorated spaces from press rooms to synagogues through the lens of decor. In doing so they shed new light on the decorative principles employed across Roman Italy and beyond. *Embodied Communication in Humans and Machines* Ipke Wachsmuth, Manuela Lenzen, Günther Knoblich, 2008-09-04. Communication is not just about the transfer of verbal information. Gestures, facial expressions, intonation, and body language are all major sources of information during conversation. This book presents a new perspective on communication, one that will help us to better understand humans and also to build machines that can communicate. Directions in Sign Language Acquisition Gary Morgan, Bencie Woll, 2002-01-01. This is the second volume in the series Trends in language acquisition research.
