Silence Of The Songbirds Bridget Stutchbury:

Silence of the Songbirds Bridget Stutchbury, 2009-05-26 Wood thrush Kentucky warbler the Eastern kingbird migratory songbirds are disappearing at a frightening rate By some estimates we may already have lost almost half of the songbirds that filled the skies only forty years ago Renowned biologist Bridget Stutchbury convincingly argues that songbirds truly are the canaries in the coal mine except the coal mine looks a lot like Earth and we are the hapless excavators Following the birds on their six thousand mile migratory journey Stutchbury leads us on an ecological field trip to explore firsthand the major threats to songbirds pesticides still a major concern decades after Rachel Carson first raised the alarm the destruction of vital habitat from the boreal forests of Canada to the diminishing continuous forests of the United States to the grasslands of Argentina coffee plantations which push birds out of their forest refuges so we can have our morning fix the bright lights and structures in our cities which prove a minefield for migrating birds and global warming We could well wake up in the near future and hear no songbirds singing But we won't just be missing their cheery calls we'll be missing a vital part of our ecosystem Without songbirds our forests would face uncontrolled insect infestations and our trees flowers and gardens would lose a crucial element in their reproductive cycle As Stutchbury shows saving songbirds means protecting our ecosystem and ultimately ourselves

Bridget Stutchbury Two-Book Bundle Bridget Stutchbury, 2014-06-24 A Yale educated professor of biology Bridget Stutchbury roams forests studying the social lives and sexual antics of birds sharing with us the curious reasons for their strange behaviour bright colouring and elaborate songs Migratory songbirds are disappearing at a frightening rate By some estimates we may have already lost almost half of the songbirds that filled the skies only 40 years ago In Silence of the Songbirds Bridget Stutchbury follows the birds on their 10 000 kilometre migratory journey and looks at the factors most threatening their extinction from pesticides to the destruction of vital habitat from the bright lights and structures of our cities to climate change We may well wake up in the near future and hear no songbirds singing In The Bird Detective author Bridget Stutchbury explains why some birds readily divorce why parents don't treat their sons and daughters equally why females sneak in quick sex with neighbouring males and why some adults forgo breeding altogether Stutchbury writes about the territorial nature of birds and describes their nesting habits revealing why some species prefer to live in over crowded groups Perhaps most important she illuminates how climate change and other pressures of the modern world are forcing birds to change their habits as they fight for their very survival

Silence of the Songbirds:

Bridget Stutchbury, 2015 Interview with Bridget Stutchbury a scientist who studies songbird migration behaviour and social life She analyzes what their songs mean and how these tiny creatures make their way from as far south as Uruguay to as far north as the boreal forests of Canada losing up to half of their body weight in the process She studies their habitat their sex lives their flight paths and the contributions they make to the very fabric of North American life Our forests our crops our gardens all depend on the birds Dr Stutchbury sounds a warning about the threats to their survival Habitat

destruction pesticides predators and collisions with skyscrapers for starters At least 18 species are in sharp decline But Stutchbury also shows how each of us can make a difference to the lives of these heartbreakingly wonderful little birds by acts as simple as choosing bird friendly coffee and toilet paper and turning off the lights in our offices Above all Bridget Stutchbury reawakens our sense of wonder at the birds who surround us and who bring such joy and colour to our lives In 2005 Dr Stutchbury was named one of the Toronto Star's People to Watch after her groundbreaking research into the sexual antics of birds made international headlines She is the author of two books Silence of the Songbirds 2007 which was shortlisted for the Governor General's Award for Nonfiction and The Bird Detective 2010 **The Private Lives of Birds**

Bridget Stutchbury, 2011-04-10 Biologist Bridget Stutchbury takes readers along on her escapades as a bird detective stalking subjects through the woods for hours taking blood samples from nestlings for DNA analysis and mounting miniature tracking devices on tiny backs She captures several young white and brown male purple martins and paints them the darker color of mature males to see if the painted youngsters are more successful than their unaltered peers in wresting away nest sites from older males They are The Private Lives of Birds is a treasure trove of fascinating insights into bird behavior But understanding the social lives of birds does much more than slake our curiosity Aware that many birds will not occupy an area unless other birds are already there biologists used mirrors and two dimensional cutouts to lure Atlantic puffins to establish colonies off the coast of Maine getting curious puffins to visit the site and linger long enough to encounter a live bird As Stutchbury says Trying to save birds without understanding what makes them tick is a shot in the dark birds are highly social and their social needs are at least as important as their physical needs Literature and Animal Studies Mario Ortiz-Robles, 2016-06-17 Why do animals talk in literature In this provocative book Mario Ortiz Robles tracks the presence of animals across an expansive literary archive to argue that literature cannot be understood as a human endeavor apart from its capacity to represent animals Focusing on the literary representation of familiar animals including horses dogs cats and songbirds Ortiz Robles examines the various tropes literature has historically employed to give meaning to our fraught relations with other animals Beyond allowing us to imagine the lives of non humans literature can make a lasting contribution to Animal Studies an emerging discipline within the humanities by showing us that there is something fictional about our relation to animals Literature and Animal Studies combines a broad mapping of literary animals with detailed readings of key animal texts to offer a new way of organizing literary history that emphasizes genera over genres and a new way of classifying animals that is premised on tropes rather than taxa The book makes us see animals and our relation to them with fresh eyes and in doing so prompts us to review the role of literature in a culture that considers it an endangered art form

Ornithologies of Desire Travis V. Mason, 2013-09-03 Ornithologies of Desire develops ecocritical reading strategies that engage scientific texts field guides and observation Focusing on poetry about birds and birdwatching this book argues that attending to specific details about the physical world when reading environmentally conscious poetry invites a critical

humility in the face of environmental crises and evolutionary history The poetry and poetics of Don McKay provide Ornithologies of Desire with its primary subject matter which is predicated on attention to ornithological knowledge and avian metaphors This focus on birds enables a consideration of more broadly ecological relations and concerns since an awareness of birds in their habitats insists on awareness of plants insects mammals rocks and all else that constitutes place The book s chapters are organized according to apparatus that is science as ecocritical tool flight and song Reading McKay s work alongside ecology and ornithology through flight and birdsong both challenges assumptions regarding humans place in the earth system and celebrates the sheer virtuosity of lyric poetry rich with associative as well as scientific details The resulting chapters interchapter and concordance of birds that appear in McKay s poetry encourage amateurs and specialists birdwatchers and poetry readers to reconsider birds in English literature on the page and in the field **The Bird**

have been seeking **Uncommon Grounds** Mark Pendergrast,2019-07-09 The definitive history of the world's most popular drug Uncommon Grounds tells the story of coffee from its discovery on a hill in ancient Abyssinia to the advent of Starbucks Mark Pendergrast reviews the dramatic changes in coffee culture over the past decade from the disastrous Coffee Crisis that caused global prices to plummet to the rise of the Fair Trade movement and the third wave of quality obsessed coffee connoisseurs As the scope of coffee culture continues to expand Uncommon Grounds remains more than ever a brilliantly entertaining guide to the currents of one of the world's favorite beverages The Reluctant Twitcher Richard Pope,2009-09-07 In 2007 Richard Pope a lifelong birder embarked on his Big Year the object being to record at least 300 birds in Ontario within that calendar period Not just another book on birding Popes unique approach is supported by an array of exceptional colour illustrations *Payback* Margaret Atwood,2007-03-15 Available in a new edition and with an introduction by Margaret Atwood Payback delivers a surprising look at the topic of debt a subject that continues to be timely Legendary novelist poet and essayist Margaret Atwood delivers a surprising look at the topic of debt a subject that continues to be timely during this current period of economic upheaval In her intelligent and imaginative approach to the subject Atwood proposes that debt is like air something we take for granted and never think about until things go wrong This is not a book about practical debt management or high finance although it does touch upon those subjects Rather it goes far deeper into an investigation of debt as a very old very central motif in religion literature and the structure of human societies By looking at how debt has informed our thinking from preliterate times to the present day through the stories we tell to our concepts of revenge and sin to the way we structure our social relationships Atwood shows that this idea of what we owe in other words debt is possibly built into the human imagination as one of its most dynamic metaphors In the final section Atwood touches upon not only our current global financial situation but also the concept of our debt to nature and how our ideas of ownership and debt must be changed if we are to find a new way to interact with our natural environment *To Have Borne Witness* Barry Cogswell,2014-04-16 We are living in a time of massive change Our planets life giving world of nature is suffering unsustainable duress and is headed towards collapse At the same time humankind is forging ahead with ever more potent and destructive industrial practices practices that are causing the over exploitation of both renewable and non renewable resources which in turn are resulting in even more worldwide environmental degradation As the power of industry becomes more efficient as the human population continues to increase and as life sustaining nature suffers ongoing trauma the situation will soon be dire Two overriding questions dominate On a finite planet can we really expect infinite growth and in our rush to grow the global economy are we condemning future generations to lives that will in fact be unsustainable If that is so as this book concludes it will inevitably cause civil conflict a conflict between the industrial extractors of natural resources and those who wish to protect our earth for future generations Until now the conflicts have been mostly law abiding but for how long can more radical reactions be deterred Through reminiscences personal

observations and documented examples of wild animal depletions the author explores the ecological damage we have already caused At the end of the book he proposes some solutions that should protect future generations from the outrages of our time But are we capable of making the necessary changes

Birds in Trouble Lynn E. Barber, 2016-04-15 As oil was washing up on the shores of Louisiana covering shorebirds and their nests and eggs after the Deepwater Horizon disaster Lynn Barber decided to write this book to heighten awareness not only of the plight of bird species that are declining in numbers every year but also of the ways in which the birds we see every day may also face the same fate First explaining the idea of birds in trouble and what that means in terms of population conservation status and national and international designations the book then turns to the habitats that are important to birds how they are affected by changes in these habitats and what ordinary people can do to help counter those negative effects Barber then profiles forty two species that are in trouble in the United States discussing the likely reasons why and what if anything we can do to improve their situations Illustrated throughout with the author's signature bird art the book closes with a reminder about what we can do to ensure that the birds we see every day in our yards parks and communities will remain with us
