Governments have introduced policies to widen the participation of disadvantaged students in higher education. Widening participation policies are also introduced to ensure that higher education contributes to social and economic outcomes. This book includes important insights from 23 leading scholars across 11 countries on a wide range of topics that focus on government policies, institutional structures, and the social and economic impacts of widening participation. While widening participation policies and outcomes in developed countries are more widely documented, the policies, achievements, and challenges in other countries such as Brazil, China, Indonesia, South Africa, and Palestine are not so widely disseminated. Therefore, the untold stories of policies and outcomes of widening participation are a key part of this book. The chapters are organised according to three overarching themes which include national and transnational studies of the history of widening participation and current policies; inclusive learning and academic outcomes; and socioeconomic structures, concepts, and theories. Engages prominent academics, earlier career researchers, and research students. Provides a wide range of topics related to widening participation. Explores social and economic impact of widening student participation. Presents untold stories of widening participation in developing countries experiencing growth in youth population.

Practical Wisdom and Resilience: Overcoming Downside Risk Kazuyo Hanai, Rangarirai Gavin Muchetu, Laban Kithinji Kinyua, Yoichi Mine, 2025-05-24. This book classifies and assesses the real and perceived risks associated with both the COVID-19 pandemic and government responses to it in seven African countries: DR Congo, Kenya, Ethiopia, South Africa, Tanzania, Uganda, and Zimbabwe, based on large-scale quantitative and qualitative surveys conducted in 2022-2024. It also elucidates the people's resilience in overcoming the risks within their political, social, and cultural context. Although research on COVID-19 has been conducted in various fields, particularly in the medical field, the analytical perspective of this book is unique. COVID-19 prevention policies are considered to have seriously increased other risks such as hunger, other infectious diseases, interruption of education, and various types of human rights violations, including increased conflict, violence against civilians, and political abuse. Therefore, this book argues that COVID-19 prevention policies, as well as the pandemic itself, should be regarded as the downside risk that triggers the deterioration of the other potential risks to vulnerable people. Depicted here is the account of how trust in government, community, and family within the existing political, social, and cultural environment created pandemic politics, as elections during the pandemic instrumentalized and politicized government prevention measures. Economic distress threatened people's lives more than COVID-19 during lockdowns and severe behavioral restrictions, and the spread of misinformation discouraged people from being vaccinated. This book will be useful to policy makers and practitioners in international society who are preparing for the next pandemic based on the lessons learned from the COVID-19 pandemic.

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09. Is globalization making our world more equal or less? Proponents of globalization argue that it is helping and that in a competitive world, no one can afford to discriminate except on the basis of skills. Opponents counter that globalization does

nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories *The Youth Dividend* Jan H.
