Similarities Between Nsfas And Other Student Loans Similarities:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt. [The Next Twenty-five Years](#) David Lee Featherman, Marvin Krislov, Martin Hall, 2009-12-18 A must read for anyone who cares about the future of higher education in diverse democracies. *From School to Higher Education?* Michael Cosser, Jacques Du Toit, 2002 This substantive report is essential reading for those involved in higher education planning and policy making. *Creating the New African University*, 2023-05-25 Creating the New African University grapples with the existence of African universities particularly in post-independent Africa where Higher Education Institutions (HEIs) are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies. The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good. It engages issues within the context of how post-colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies. This book further highlights an urgent need to do away with silos and embrace a multidisciplinary, interdisciplinary, transdisciplinary and cross-disciplinary dialogical approach towards knowledge generation. Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social, economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements.
