argues that COVID 19 prevention policies as well as the pandemic itself should be regarded as the downside risk that triggers the deterioration of the other potential risks to vulnerable people. Depicted here is the account of how trust in government, community and family within the existing political, social and cultural environment created pandemic politics as elections during the pandemic instrumentalized and politicized government prevention measures. Economic distress threatened people's lives more than COVID 19 during lockdowns and severe behavioral restrictions, and the spread of misinformation discouraged people from being vaccinated. This book will be useful to policy makers and practitioners in international society who are preparing for the next pandemic based on the lessons learned from the COVID 19 pandemic.

Transforming Universities in South Africa, 2020-08-31. The idea of transformation in higher education underpins all policy documents, academic literature and on-going debates in South Africa. *Transforming Universities in South Africa: Pathways to Higher Education Reform* responds to the pressing need to comprehensively review the post-apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio-economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag-raising and new anthem-singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible.
