Mohammad Mozaffari, 2024-12-13 This volume presents comprehensive investigations into various facets of observational astronomy during the medieval Islamic period spanning from the ninth to the seventeenth centuries The chapters compiled here originally published between 2012 and 2018 have undergone significant revisions to enhance their accuracy and explore a broad spectrum of topics organized into five main sections Reflections on Observational Astronomy in the Medieval Islamic Period begins with solar astronomy providing a detailed evaluation of Islamic astronomers determinations of fundamental solar parameters In the realm of lunar astronomy it examines the gradual endorsement and rationalization of annular solar eclipses along with an exclusive historical account of predicting and observing such an event in 1283 CE The section on planetary astronomy scrutinizes empirical discoveries that distinguish between the precession of equinoxes and the motion of apogees as well as significant enhancements to Ptolemy s parameters for planetary latitudes Stellar astronomy is explored through a non Ptolemaic star table that encompasses observations from ninth century Baghdad to thirteenth century Mar gha The final section examines observational instruments focusing on those constructed during the second period of activities at the Mar gha observatory A critical analysis of astronomical observations conducted at the Mar gha and Istanbul observatories is a key focus of this work This book will be invaluable to those interested in the historical progression of exact

sciences the scope distinctive aspects and caliber of experimental activities in medieval times and the interplay between theory and observation throughout history It is intended for historians scientists including astronomers and physicists and particularly historians of astronomy P. V. M. Bucolicorum Eclogae decem. The Bucolicks of Virgil, with an English translation and notes, by J. Martyn. Second edition. Lat. and Eng Virgil, 1813 *Reading the Way to the Netherworld* Ilinca Tanaseanu-Döbler, Gabriela Ryser, 2016-12-05 The volume focuses on the various representations of the Beyond in later Antiquity a period of intense interaction and competition between various religious traditions and ideals of education The concepts and images clustering around the Beyond form a crucial focal point for understanding the dynamics of religion and education in later Antiquity Although Christianity gradually supersedes the pagan traditions the literary representations of the Beyond derived from classical literature and transmitted through the texts read at school show a remarkable persistence they influence Christian late antique writers and are still alive in medieval literature of the East and West A specifically Christian Beyond develops only gradually and coexists subsequently with pagan ideas which in turn vary according to the respective literary and philosophical contexts Thus the various conceptualisations of the great existential unknown serves here as a point of reference for mirroring the changes and continuities in Imperial and Late Antique religion education and culture and opening up further perspectives into the Medieval world *Country Life Illustrated* ,1905
