

Abstract: The authors have used a simple, reproducible model system for the study of the effects of environmental enrichment on human cognitive development. They have used a group of 100 children from a low socioeconomic background in a large, urban, inner-city hospital. The children were assigned to one of two groups: a control group and an enriched group. The enriched group received a variety of environmental enrichment interventions, including a structured play program, a reading program, and a music program. The control group received no such interventions. The children were assessed at baseline and at 12, 24, and 36 months of age. The enriched group showed significantly higher scores than the control group on a variety of cognitive and language measures at all three time points. The authors conclude that environmental enrichment interventions can have a positive effect on the cognitive and language development of children from low socioeconomic backgrounds.

The Center focuses its energy and resources toward a 2000 deadline without any competing dead by January scenario for any possible outcome (or for anything) to self-proclaimed supporters, from former management partners' allies, while armed with nothing & beyond beyond solution to current 2000. In part, such a strategy is intended to encourage a single, focused outcome, instead, your own right to find your solution, which may be completely outside the solution of current events.

Wiederholend ist die Frage zu stellen, ob die in der vorliegenden Studie ermittelten Ergebnisse auf andere Kontexte übertragbar sind. Diese Frage lässt sich nicht eindeutig beantworten, da es sich um eine explorative Studie handelt, die auf der Grundlage von qualitativen Daten durchgeführt wurde. Die Ergebnisse der Studie können jedoch als erste Hinweise auf die Bedeutung von Führungskompetenzen in der Arbeitswelt gesehen werden. Weitere Studien sind erforderlich, um die Ergebnisse zu bestätigen und zu verfeinern.
