This book analyses the impact of CAFTA DR and European Free Trade Agreements on the industrial property system in Central America. While there is ample literature on bilateral and regional FTAs, it is often limited to the contractual obligations assumed by the participating countries. This book goes a step further and analyses how these obligations are implemented through national legislation, institutional changes, and legal practice. To provide a deeper understanding of the effects of FTAs on national IP systems, the book addresses research questions that go beyond general publications on the topic. Research questions include: Is the combination of market access and IP rules in a bilateral FTA an effective and appropriate trade deal? How are the IP requirements under the FTAs implemented into the national statutory framework? Do the IP rules of FTAs sufficiently address institutional factors necessary for an effective IP system? Do they provide for an appropriate balance between minimum protection and flexibilities and support relevant IP policy objectives? The book covers the CAFTA DR member states: Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua, reviewing the implementation of FTA obligations regarding patents, plant varieties, test data, trademarks, geographical indications, designs, genetic resources, and traditional knowledge enforcement and other areas. By looking at several countries, a broad range of IP rights and the practical implementation of FTA obligations, this book provides a broad range of information and insights.

Brazil and the United States Joseph Smith, 2010-11-15 Although Brazil and the United States have long regarded each other sympathetically, relations between the two countries have been adversely affected by geographical distance, language barriers, and cultural indifference. In this comprehensive overview, Joseph Smith examines the history of Brazil-U.S. relations from the early nineteenth century to the present day. With the exception of commerce, notably the coffee trade, there was relatively little contact between the countries during the nineteenth century. A convergence of national interests took place during the first decade of the twentieth century and was exemplified in Brazil's strategy of approximating its foreign policy to that pursued by the United States. In return, Brazil expected economic gains and diplomatic support for its ambition to be the leading power in South America. But U.S. leaders were cautious, and self-serving Brazil was treated as a special ally according to Smith, but only at times of major crisis such as the two world wars. As the twentieth century progressed, friction developed over programs of U.S. financial assistance and efforts to deal with the threat of communism. Recently, there have been disagreements over Brazil's determination to take its rightful place as a global economic player and regional leader. Nonetheless, history reveals that these two giant nations of the Western Hemisphere share national interests that they realize are best served by maintaining a friendly cooperative relationship.
