collecting it you need to consider research methodological considerations such as the validity of research information ethics and dependability After this comes the research plan which might be purely theoretical or include some elements of experimentation A researcher has to create a research approach tailored to the topic of study It s important to keep in mind that even if two topics seem same study approach the research technique may be different The researcher has to be well versed in not just the research technique but also the research methodologies appropriate to the study at hand The credibility and reliability of the results of a study may be attributed to the technique used to conduct the study
