Decision Making Systems in Business Administration, 2013

This book analyzes some of the most recent advances in the field of decision making and fuzzy systems applied to business and economics presented at the International Conference on Modeling and Simulation MS 12 Rio de Janeiro 10-13 December 2012. In this conference a special focus is given to the fundamental concept of sustainable development. Other key applications in business, economics and finance are also considered. In general it is very useful for graduate students and researchers interested in pursuing research that combines quantitative techniques such as modeling and simulation and decision making with business and economic problems. This is especially useful when dealing with complex environments where the information is very uncertain and additional mathematical and statistical techniques are needed in order to understand the specific situations considered.
