Addressing Special Educational Needs and Disability in the Curriculum: Science
Marion Frankland, 2017-05-18. The SEND Code of Practice 2015 reinforced the requirement that all teachers must meet the needs of all learners. This topical book provides practical tried and tested strategies and resources that will support teachers in making science lessons accessible and exciting for all pupils including those with special needs. The author draws on a wealth of experience to share her understanding of special educational needs and disabilities and show how science teachers can reduce or remove any barriers to learning. Offering strategies that are specific to the context of science teaching this book will enable teachers to help all students develop their evidence gathering skills and aid their scientific discovery by involving the use of all of the senses and structuring tasks appropriately. Create a supportive environment that maximises learning opportunities. Plan the classroom layout and display to enhance learning. Use technology to adapt lessons to the needs of individual pupils. Successfully train and fully use the support of their teaching assistants. An invaluable tool for continuing professional development this text will be essential for teachers and their teaching assistants seeking guidance specific to teaching science to all pupils regardless of their individual needs. This book will also be of interest to SENCOs senior management teams and ITT providers. In addition to free online resources a range of appendices provide science teachers with a variety of writing frames and activity sheets to support effective teaching. This is an essential tool for science teachers and teaching assistants and will help to deliver successful inclusive lessons for all pupils.

Theoretical and Practical Teaching Strategies for K-12 Science Education in the Digital Age Trumble, Jason, Asim, Sumreen, Ellis, Joshua, Slykhuis, David, 2023-01-17 Digital age learners come to the science classroom equipped with a wide range of skills and a wealth of information at their fingertips Although science and technology have enjoyed a symbiotic relationship the ubiquity of information technologies requires teachers to modify instruction and experiences for K 12 science learners

Environmental and societal changes have impacted how and when students acquire and synthesize knowledge. These changes compel us to modify and adjust to improve the practice of teaching science to meet the unique needs of students who are growing up in a society dominated by connected digital devices, constant communication, and the ubiquity of information. *Theoretical and Practical Teaching Strategies for K-12 Science Education in the Digital Age* disseminates theory-informed practices for science teachers that increase their instructional effectiveness in teaching digital-age learners. It communicates how to increase science educators' understandings of the needs of digital-age learners, develops theoretical and practical teaching strategies that align with science content, and integrates technologies for learning with fidelity. Covering topics such as design-based inclusive science, project-based learning, and science instruction, this premier reference source is an excellent resource for administrators and science educators within K-12 education, pre-service teachers, teacher educators, librarians, researchers, and academicians.

Towards a Framework for Representational Competence in Science Education Kristy L. Daniel, 2018-06-20. This book covers the current state of thinking and what it means to have a framework of representational competence and how such theory can be used to shape our understanding of the use of representations in science education, assessment, and instruction. Currently, there is not a consensus in science education regarding representational competence as a unified theoretical framework. There are multiple theories of representational competence in the literature that use differing perspectives on what competence means and entails. Furthermore, dependent largely on the discipline, language discrepancies cause a potential barrier for merging ideas and pushing forward in this area. While a single unified theory may not be a realistic goal, there needs to be strides taken toward working as a unified research community to better investigate and interpret representational competence. An objective of this book is to initiate thinking about a representational competence theoretical framework across science educators, learning scientists, practitioners, and scientists. As such, we have divided the chapters into three major themes to help push our thinking forward, presenting current thinking about representational

competence in science education assessing representational competence within learners and using our understandings to structure instruction **Resources in Education** ,1998 **Challenges in Primary Science** David Coates,Helen Wilson,2012-12-06 This practical and easy to use book enables teachers to challenge able children to develop their potential and to extend their thinking in primary science It links theory to practice to develop understanding of what it means to be an able scientist and empowers teachers to build on their existing good practice to build an inclusive science curriculum for able children Special features include photocopiable resources that are linked to the National Curriculum and the QCA schemes of work teacher guidance on the use of these resources and how they can be incorporated into normal primary science lessons and suggestions for assessment Science Formative Assessment, Volume 2 Page Keeley,2014-10-16 Deepen scientific understanding with formative assessment Only by really knowing what your students are thinking can you design learning opportunities that deepen content mastery and meet their individual needs In this highly engaging resource internationally respected expert Page Keeley shares 50 new techniques to pinpoint student understanding before during and after instruction In addition to promoting best practices in the classroom the techniques shared here support learning and link instruction to the Next Generation Science Standards These flexible assessments can be used with any science curriculum along with Practical strategies for use throughout the instruction cycle Considerations for implementation and suggestions for modification An explanation of how each technique promotes learning **Cyber-Physical Laboratories in Engineering and Science Education** Michael E. Auer,Abul K.M. Azad,Arthur Edwards,Ton de Jong,2018-04-26 This volume investigates a number of issues needed to develop a modular effective versatile cost effective pedagogically embedded user friendly and sustainable online laboratory system that can deliver its true potential in the national and global arenas This allows individual researchers to develop their own modular systems with a level of creativity and innovation while at the same time ensuring continuing growth by separating the responsibility for creating online laboratories from the responsibility for overseeing the students who use them The volume first introduces the reader to several system architectures that have proven successful in many online laboratory settings The following chapters then describe real life experiences in the area of online laboratories from both technological and educational points of view The volume further collects experiences and evidence on the effective use of online labs in the context of a diversity of pedagogical issues It also illustrates successful online laboratories to highlight best practices as case studies and describes the technological design strategies implementation details and classroom activities as well as learning from these developments Finally the volume describes the creation and deployment of commercial products tools and services for online laboratory development It also provides an idea about the developments that are on the horizon to support this area
