Greenfield, 2014 This second edition of the now classic lab manual *Antibodies* by Harlow and Lane has been revised extended and updated by Edward Greenfield of the Dana Farber Cancer Center with contributions from other leaders in the field Once again the manual is an essential resource for molecular biology immunology and cell culture labs on all matters relating to antibodies The chapters on hybridomas and monoclonal antibodies have been recast with extensive new information and there are additional chapters on characterizing antibodies antibody engineering and flow cytometry As in the original book the emphasis in this second edition is on providing clear and authoritative protocols with sufficient background information and troubleshooting advice for the novice as well as the experienced investigator *Portable Protocols (Using Antibodies)* Edward Harlow, David Lane, 1998-12 Few technical manuals have become standards in biomedicine *Antibodies A Laboratory Manual* by Ed Harlow and David Lane has had that status for a decade Now there is a new and even higher standard *Using Antibodies A Laboratory Manual* Harlow and Lane have completely revised their guide to the use of immunoglobulin reagents in the laboratory Chapters have been entirely rewritten reorganized and updated to provide background context and step by

step instructions for techniques that range from choosing the right antibody and handling it correctly to the proper methods for characterizing antigens in cells and solutions New chapters on tagging proteins and epitope mapping are included Rather than presenting an array of solutions for working with antibodies and antigens Using Antibodies instead identifies in each case the best approach to specific problems These recommendations include more detail in the protocols extensive advice on avoiding and solving problems information regarding proper controls and extensive illustration of theory methods and results both good and bad An additional bonus included with this manual is a set of Portable Protocols step by step instructions for the most frequently used and essential techniques printed on spill proof durable cards that can be annotated and used directly at the bench The expert advice in Using Antibodies is presented using an imaginative design with extensive use of color and graphic elements calculated to help readers plan and execute their experiments efficiently and accurately A newly available type of binding will maintain the manual s integrity during years of use This new manual reflects a decade s additional research experience by two outstanding scientists of international reputation Since writing the previous manual Ed Harlow has received many awards notably the General Motors and Bristol Myers prizes for cancer research and he was elected to the National Academy of Sciences David Lane also the winner of many awards such as the Yvette Mayent Prize and the Paul Ehrlich and Ludwig Darmstaedter Award was elected as a fellow of the Royal Society The over the shoulder advice these experts provide in Using Antibodies will lead all laboratory investigators to success in using these techniques regardless of experience Using Antibodies is a required resource for every laboratory in which genes cells and proteins are studied
