Towards an Islamic Lunisolar Calendar Hisham Abad,2021-04-10

The Calendar was invented in ancient times to allow nations to pace their economic and social activities with climatic seasons Throughout the history of civilizations much depended on organizing and administering an accurate calendar Hunter gatherers needed the calendar to predict the migrations of herds of wild animals As humanity advanced farming communities required calendars to predict the coming of rain or the time of the flooding of rivers Traders and seafaring communities needed to map the best time of the year to tackle the dangers of seas when sailing far from home In contemporary times of globalization calendars have become even more critical in optimizing the complex supply chains of local and global production cycles Oral traditions ascertain that the Arabs of the Arabian Peninsula used a rudimentary lunisolar calendar called in the literature the Arabian Calendar Like with all nations the lunisolar Arabian Calendar helped the Arabs organize their meager resources in the best ways possible For example research showed that the ajj season and its pan Arabian markets were scheduled to coincide with the date harvesting season peaking from July to September The abundance of the date harvest available in this period along with assigning the concept of inviolability to the Arabian months spanning this season allowed them to travel across Arabia to Mecca to trade in the pan Arabian markets and to participate in the religious rituals of their pilgrimage the ajj It is asserted in this book that Prophet Mu ammad followed the lunisolar Arabian Calendar all his life At the end of the tenth year after he migrated from Mecca to Med na and during his Farewell Pilgrimage the Qur n sternly abolished the process of intercalation i e the Nas the very process which allowed the Arabs to organize their various economic and religious activities When Caliph Umar ibn al Kha b initiated the Hijri Calendar seven years after Prophet Mu ammad death i e in 17 AH he founded it as purely lunar which meant its months were allowed to float within the solar year Caliph Umar is famous for his zeal in protecting the fundamental Islamic principle of monotheism This I show was the reason for introducing the Hijri Calendar as purely lunar because Nas i e Quraysh s method of intercalation was hopelessly entangled with the polytheistic religion of Quraysh the Prophet s tribe and the guardian of the holy places in Mecca and its

environs The harmful effects of following the purely lunar Hijri Calendar were realized from early on But the prohibition of Nas inhibited the early Islamic caliphs from reforming the Hijri Calendar This book explores the history of the Arabian Calendar and its intimate connection with the Hijri Calendar The main findings of this book are as follows 1 The main ajj shrines in Macca are aligned in the direction of sunrises and sunsets of the Summer Solstice day 2 Quraysh intercalated its Arabian Calendar by forcing the Summer Solstice SS Day to occur within the 11th month of the Arabian Calendar Shaww l The Nas month was added when the onset of the SS was about to transfer to into the 11th month Dh l Qa da 3 The onset of the SS day was determined through the sunset alignment along the line joining the posts of al Wos and al Aqaba Jamar t and also by observing the sun rising from behind the peak of mount Thab r from the location of the sacrificial altar of pre Islamic Mina 4 The Prophet arrived in his migration from Mecca to Med na on the Days of sh r which corresponded to the dates of 8th of Rab I the 10th of the Hebrew month Tishri and to the 23rd of September 632 5 The epoch of the Hijri Calendar must be adjusted back by two days from the epoch used so far 6 The Farewell Pilgrimage occurred in autumn on September 4 632 CE not in spring on March 11 632 CE **Arabic language guide for travelers , Lost Days** Kaia

Stonebrook,Al,2025-03-05 Lost Days explores the intriguing history of calendar reforms revealing the surprising instability of our modern timekeeping systems Far from being a fixed standard our calendar has undergone numerous adjustments reflecting the complex interplay of science history and societal needs The book delves into the fascinating story behind temporal shifts like the Gregorian calendar reform of 1582 when ten days were omitted illustrating the scientific and political motivations behind such drastic measures These adjustments highlight how our perception of time is a human construct shaped by astronomical observations and societal compromises The book systematically examines historical records and astronomical data beginning with the fundamental principles of calendar construction and pre Gregorian systems It progresses through an in depth analysis of the Gregorian reform and concludes with modern timekeeping challenges such as leap seconds By bridging history and science Lost Days offers a comprehensive view of calendar development demonstrating the continuous need for timekeeping refinement to reconcile astronomical time with human defined systems and emphasizing the importance of understanding calendar adjustments for interpreting historical events *Islam and Social Work* Crabtree, Sara Ashencaen,Husain, Fatima,Basia Spalek,2016-12-07 Social services have typically addressed equality and diversity issues through the lens of race and ethnicity while the faith identities of minority ethnic communities have been largely bypassed But in our contemporary world there is a strong need for policies and services that are sensitive to faith in general and to Islam in particular This unique book enables social work practitioners to gain a deeper understanding of how Islamic principles inform and influence the lives of Muslim populations Designed to support work with families and faith communities it examines religious precepts cosmologies philosophies and daily practices while acknowledging cultural variants and population heterogeneity The second edition includes a comprehensive update of the research literature detailed description
