The Shining Ones Philip Gardiner, 2002 For many years now there has been an upsurge in revelation stories and alternative viewpoints on man's history People such as Graham Hancock and Lawrence Gardner have brought to light many new ideas and many new problems Now there is a new theory which is all encompassing and clearly brings into focus a more sinister reason behind the emergence of civilisation In his theory on Atlantis Graham Hancock is receiving much admiration and academic acclaim Standard academic thought is more towards the spontaneous eruption of civilisation across the globe with little or no explanation of why there are so many similarities between the cultures Now Philip Gardiner in his new book THE SHINING ONES is set to turn even this upon its head The theory is so simple that it begs the question why has it not been thought of before The reason for universal similarity of architecture language art travel and religious belief is quite simply an ancient and secret religious brotherhood who have hidden themselves deep within the symbols ciphers and codes of our ancient texts for hundreds of years They held a secret knowledge and power base which spread with them across the globe The very title that they have given themselves is hidden within the standard text and religious books we use every day The Shining Ones Put like this the whole thing can sound like an X Files conspiracy theory However the author has invested huge amounts of time and energy checking researching and seeking the advice of academics Now the theory is attracting the attention of historians who can see that the patterns are as subtle as this author proposes The fact is this theory does explain away all the problems with dating and variations that people such as Hancock have come up against Many academics and especially Egyptologists are now turning to this way of thinking and with Gardiner's spirit and broad knowledge in history and language the history of the ancients and the secrets that they hold are becoming more clear There are of course dissenters The author has been accosted for his standpoint and there are still those hardened academics and even non academics who refuse to even listen However there is a major TV documentary in pre production stages and with interviews planned across the nation

on radio and TV the message may soon be accepted as a credible theory Signs, Symbols and Ciphers Georges Jean,1998 To communicate people have always used signs and symbols marks gestures and words that represent abstract ideas and concrete objects Over time these have multiplied into an immense and complex network of images figures emblems We use signs to measure such difficult concepts as number danger value distances in time and space and even love How does a sign represent the thing for which it substitutes How do we come to understand the meaning of a written symbol What happens when a sign crosses international borders of language and culture Chapter by chapter Georges Jean conducts us through the fascinating realm of maps pictograms logographs letterforms patterns signals codes and facial expressions Henri Cartier-Bresson. by Clment Chroux Clément Chéroux,2008 Henri Cartier Bresson s photography came to define the 20th century This book tells his life story through his images all the major events from his youth to his death in 2004 are described contextualized and analysed in the light of his photographic work From his early encounters with the Surrealists his film work and his experiences in the Second World War to the development of his own personal aesthetic the concept of the decisive moment and the foundation of Magnum Photos his influence on the world has been profound and unforgettable
