[The Magic of Code](#) Samuel Arbesman,2025-06-10 In the tradition of classics such as The Lives of a Cell a bold reframing of our relationship with technology that is more positive and human centered In the digital world code is the essential primary building block the equivalent of the cell or DNA in the biological sphere and almost as mysterious Code can create entire worlds real and virtual it allows us to connect instantly to people and places around the globe and it performs tasks that were once only possible in science fiction It is a superpower and not just in a technical sense It is also a gateway to ideas As vividly illustrated by Samuel Arbesman it is the ultimate connector providing new insight and meaning into how everything from language and mythology to biblical texts biology and even our patterns of thought connect with the history and nature of computing While the building block of code can be used for many wondrous things it can also create deeper wedges in our society and be weaponized to cause damage to our planet or our civilization Code and computing are too important to be left to the tech community it is essential that each of us engage with it And we fail to understand it to our detriment By providing us with a framework to think about coding and its effects upon the world and placing the past current and future developments in computing into its broader setting we see how software and computers can work for people as opposed to against our needs With this deeper understanding into the why of coding we can be masters of technology rather than its subjects

Spatial Microsimulation with R Robin Lovelace,2017-09-07 Generate and Analyze Multi Level Data Spatial microsimulation involves the generation analysis and modeling of individual level data allocated to geographical zones Spatial Microsimulation with R is the first practical book to illustrate this approach in a modern statistical programming language Get Insight into Complex BehaviorsThe book progresses from the principles underlying population synthesis toward more complex issues such as household allocation and using the results of spatial microsimulation for agent based modeling This equips you with the skills needed to apply the techniques to real world situations The book demonstrates methods for population synthesis by combining individual and geographically aggregated datasets using the recent R packages ipfp and mipfp This approach represents the best of both

worlds in terms of spatial resolution and person level detail overcoming issues of data confidentiality and reproducibility Implement the Methods on Your Own Data Full of reproducible examples using code and data the book is suitable for students and applied researchers in health economics transport geography and other fields that require individual level data allocated to small geographic zones By explaining how to use tools for modeling phenomena that vary over space the book enhances your knowledge of complex systems and empowers you to provide evidence based policy guidance **Greening the College Curriculum** Jonathan Collett, Stephen Karakashian, 2013-04-10 Greening the College Curriculum provides the tools college and university faculty need to meet personal and institutional goals for integrating environmental issues into the curriculum Leading educators from a wide range of fields including anthropology biology economics geography history literature journalism philosophy political science and religion describe their experience introducing environmental issues into their teaching The book provides a rationale for including material on the environment in the teaching of the basic concepts of each discipline guidelines for constructing a unit or a full course at the introductory level that makes use of environmental subjects sample plans for upper level courses a compendium of annotated resources both print and nonprint Contributors to the volume include David Orr David G Campbell Lisa Naughton Emily Young John Opie Holmes Rolston III Michael E Kraft Steven Rockefeller and others The Rearguard of Subjectivity Frank Fleerackers, 2023-09-02 Edmund Husserl's ideas informed by Kant's Critiques constituted a point of departure when rereading philosophical problems of subject and subjectivity In his *Phänomenologie und Egoologie* 1961-63 Jan Broekman revealed how Husserl analysed the Split Ego notion in Kant's vision which became fundamental for his phenomenology The form and function of subjectivity were likewise positioned in psychiatry and literature as well as in aesthetics as Jan Broekman's texts on cubism demonstrated Problems of language unfolded in studies on topics ranging from the texts of Ezra Pound to the dialogic insights of Martin Buber all of which were involved in the development of semiotics Two themes accompanied these insights the notion and later Parisian mainstream called structuralism and the urgent need to arrive at deeper insights into the links between Marxism and phenomenology Central language concepts also played a part as early as 1986 Jan Broekman published on semiology and medical discourse and in 1992 on neurosemiotics before addressing the link between speech act and legal as well as social freedom in 1993 In all these works the subject and the atmosphere of subjectivity were essential aspects In addition to his writing Jan Broekman gave courses on current philosophical issues law and medicine until retiring in 1996 and in his *Intertwinements of Law and Medicine* revisited subjectivity aspects while also offering a synthetic view In this *Festschrift* in honour of Jan Broekman the contributions address the analogue digital dichotomy in semiotics the multicultural self in language and semiotics semiology and legal discourse the legal subject and the atmosphere of subjectivity intertwinements of law and medicine the semiotics of law in legal education signs in law and legal discourse making meaning in law and legal speech acts Encyclopedia of Educational Theory and Philosophy D.
