Democratizing Higher Education Policy M.T. Sehoole, 2013-10-14 This book was written with the purpose of analyzing the challenges faced by the post apartheid government in South Africa with regard to reform of higher education. It covers the apartheid context of higher education, resistance to the system and its ultimate demise, democratic processes in post apartheid reform agenda and how this agenda was emptied of its radical content as a result of global and local pressures. Highlighted are key constraints in the reform process including the compromise pact agreed upon between the apartheid government and the ruling African National Congress, the rapidly globalizing environment underpinned by neoliberal principles within which South Africa's transition took place, shifts in macro economic policies of government towards neo liberal policy, the inheritance of the bureaucracy and the inexperience of new government officials. These are presented in a narrative style that combines the author's experience, the voices of key players involved and important data from a range of documentary sources. This is the first single authored book in post apartheid South Africa that has systematically looked at higher education reform.

The State, Education and Equity in Post-Apartheid South Africa Enver Motala, 2020-09-10 This title was first published in 2002. Has the South African post apartheid state been able to achieve its stated goals? What has been the relationship between the process of educational reform and the impact on the state of the Constitution and other laws? This seminal book responds to these questions by examining the development and implementation of social policy in South Africa during the first years of democratic government, particularly in relation to education. The post apartheid state was immediately faced with a broad spectrum of political, social, economic and human rights issues. The research analyzes whether the aims and objectives of the new administration were achieved. No other single collection of research in South Africa collectively explores the issues raised in this endeavour. The book will appeal to a wide range of professionals including researchers, academics, planners, policy makers, public servants and postgraduate students.
