Unreal Michael D. Halliday,2015-12-22 This book takes a critical but easy to read look at key subjects in the humanities including our human limitations and the weaknesses in philosophy itself It examines major areas such as religion where thinkers go beyond science in an attempt to find the ultimate realities it turns a sceptical eye on moral codes of social behaviour artistic beliefs and values and radically appraises just what we can come to know about our history A final chapter probes behind the often fond and fanciful notions of that which we find meaningful in culture and our lives more generally In short an engaging disturbing and thought provoking modern world view is on offer here along the paths for tracking truth A common theme that links the wide ranging subjects in the book is to question the coherence of their character in some cases their worth and desirability and even their own reality It poses a radical challenge to conventional ways of looking at matters across the humanities by combining the text with insights from contemporary continental thinkers In Unreal there is largely a chopping down yet the intention is not to be negative for the sake of it but to ensure that people are not duped by the manifold cases of intellectual charlatanism in the wider world That some of this erroneous thinking is extensive enough to encompass whole subjects is perhaps no surprise yet it is both a scandalous and dangerous reflection on human thought

African Traditional And Oral Literature As Pedagogical Tools In Content Area Classrooms Lewis Asimeng-Boahene, Michael Baffoe, 2013-12-01 For a long time many American educators and educational stakeholders have drawn their ideas for educational reforms from ideas

generated in Europe and Asia for the changing demographics of America's diverse classrooms. This book is therefore motivated by a bold attempt at advocating for the revision of existing pedagogic fora and the creation and addition of new fora that would provide for the inclusion of thoughts, perspectives and practices of African traditional oral literature in the pedagogical tools of content area classrooms especially in North America. The articles that are presented in this book provide theoretical frameworks for using African traditional oral literature and its various tenets as teaching tools. They bring together new voices of how African literature could be used as a helpful tool in classrooms. Rationale for agitating for its use as ideal for pedagogic tool is the recurrent theme throughout the various articles presented. The book explores how educators, literacy educators, learners, activists, policy makers and curriculum developers can utilize the powerful yet untapped gem of African oral literature as pedagogical tools in content area classrooms to help expand educators' repertoire of understanding beyond the conventional wisdom of their pedagogic creed. It is a comprehensive work of experienced and diverse scholars, academicians and educators who have expertise in multicultural education, traditional oral literature, urban education, children's literature and culturally responsive pedagogy that have become the focus of U.S. discourses in public education and teacher preparation. This anthology serves as part of the quest for multiple views about our global village, emphasizing the importance of linking the idea of diverse knowledge with realities of global trends and development. Consequently, the goal and the basic thrust of this anthology is to negotiate for space for non-mainstream epistemology to share the pedagogical floor with the mainstream template to foster an alternative vision of reality for other knowledge production in the academic domain. The uniqueness of this collection is the idea of bringing the content and the pedagogy of most of the genres of African oral arts under one umbrella and thereby offering a practical acquaintance and appreciation with different African cultures. It therefore introduces the world of African mind and thoughts to the readers. In summary, this anthology presents an academic area which is now gaining its long overdue recognition in the academia.

A Life with Poetry Joan Peskin, David I. Hanauer, 2023-02-22. This volume examines the development of poetic literacy including the specific processes used by expert poetry readers and professional poets. In doing so, it provides a much needed synthesis of research findings across diverse domains such as human development, the scientific study of literature, cognitive psychology, neuroscience, psycholinguistics and education. An important feature of the book is its exploration of the new and relatively unexplored area of research on the development of poetic writing. Both theoretical and practical, the volume will be of interest to researchers as well as educators. The detailed explication of expert knowledge and the trajectory through which relative novices become relative experts should allow educators to make evidence-based decisions. Valuable guidelines for developmentally appropriate practice in pedagogical settings are provided to better optimize learning and inspire students from preschool to graduate school and beyond.
