**Simple Things Won't Save the Earth** J. Robert Hunter, 2014-02-19 We drive cars with Save the Whales bumper stickers buy aerosol sprays that advertise no chlorofluorocarbons and wear T shirts made from organically grown cotton All of these earth friendly choices and products convince us that we are thinking globally acting locally and saving the planet But are we really In this provocative book J Robert Hunter asserts that using catchy slogans and symbols to sell the public on environmental conservation is ineffective misleading and even dangerous Debunking the Fifty Simple Things You Can Do to Save the Earth approach Hunter shows that there are no simple solutions to major environmental problems such as species extinction ozone depletion global warming pollution and non renewable resource consumption The use of slogans and symbols Hunter argues simply gives the public a false sense that someone is solving the environmental crisis while it remains as serious now as when the environmental movement began Writing in plain yet passionate prose for general readers he here opens a national debate on what is really required to preserve the earth as a habitat for the human species

**Confronting Consumption** Thomas Princen, Michael Maniates, Ken Conca, 2002 Essays that offer ecological social and political perspectives on the problem of overconsumption

**Ecopiety** Sarah McFarland Taylor, 2019-11-12 Tackles a human problem we all share the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth The stories we encounter about the environment in popular culture too often promote an imagined moral economy assuring us that tiny acts of voluntary personal piety such as recycling a coffee cup or purchasing green consumer items can offset our destructive habits No need to make any fundamental structural changes The trick is simply for the consumer to buy the right things and shop our way to a greener future It's time for a reality check Ecopiety offers an absorbing examination of the intersections of environmental sensibilities contemporary expressions of piety and devotion and American popular culture Ranging from portrayals of environmental sin and virtue such as the eco pious depiction of Christian Grey in Fifty Shades of Grey to the green capitalism found in the world of mobile device carbon sin tracking software applications to the socially conscious vegetarian vampires in True Blood the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments Taylor makes the case that it is not through a framework of grim duty or obligation but through one of play and delight that we may move environmental ideals into substantive action

**Powerdown** Richard Heinberg, 2004-09-01 This stark look at prospects for a truly sustainable culture speaks frankly about how it is time to Powerdown or to reduce per capita resource usage in wealthy countries develop alternative energy sources and much more

**Mother Jones Magazine**, 1998-01 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues

**Acting Locally** Harold Ward, 2023-07-03 Ninth in the Service Learning in the Disciplines Series this book discusses the pervasive use of service learning in environmental studies programs and explains

why it often is a required part of the environmental studies curriculum Contributors from a wide range of college and university environmental studies programs discuss the benefits and challenges these programs provide and the consequent natural fit between environmental studies and service learning Environmental Health Perspectives, 1997 Fifty Years of Good Reading University of Texas Press, 2000 50 year since founding the University of Texas they have witnessed major evolutions in the world of publishing *The Environmental Responsibility Reader* Martin Reynolds, Christine Blackmore, Mark J. Smith, 2009-08-15 The Environmental Responsibility Reader is a definitive collection of classic and contemporary environmental works that offers a comprehensive overview of the issues involved in environmental responsibility steering the reader through each development in thought with a unifying and expert editorial voice This essential text expertly explores seemingly intractable modern day environmental dilemmas including climate change fossil fuel consumption fresh water quality industrial pollution habitat destruction and biodiversity loss Starting with Silent Spring and moving through to more recent works the book draws on contemporary ideas of environmental ethics corporate social responsibility ecological justice fair trade global citizenship and the connections between environmental and social justice configuring these ideas into practical notions for responsible action with a unique global and integral focus on responsibility

The Language of Trees: A Rewilding of Literature and Landscape Katie Holten, 2023-04-04 NATIONAL BESTSELLER Inspiring insights that are scientific intimate and surprising a call to action for those who still care The Washington Post Inspired by forests trees leaves roots and seeds The Language of Trees A Rewilding of Literature and Landscape invites readers to discover an unexpected and imaginative language to better read and write the natural world around us and reclaim our relationship with it In this gorgeously illustrated and deeply thoughtful collection Katie Holten gifts readers her tree alphabet and uses it to masterfully translate and illuminate beloved lost and new original writing in praise of the natural world With an introduction from Ross Gay and featuring writings from over fifty contributors including Ursula K Le Guin Ada Lim n Robert Macfarlane Zadie Smith Radiohead Aimee Nezhukumatathil James Gleick Elizabeth Kolbert Plato and Robin Wall Kimmerer Holten illustrates each selection with an abiding love and reverence for the magic of trees She guides readers on a journey from creation myths and cave paintings to the death of a 3 500 year old cypress tree from Tree Clocks in Mongolia and forest fragments in the Amazon to the language of fossil poetry unearthing a new way to see the natural beauty all around us and an urgent reminder of what could happen if we allow it to slip away The Language of Trees considers our relationship with literature and landscape resulting in an astonishing fusion of storytelling and art and a deeply beautiful celebration of trees through the ages *The Green Braid* Kim Tanzer, Rafael Longoria, 2007-04-11 This volume presents the discipline s best thinking on sustainability in written drawn and built form drawing on over fifteen years of peer reviewed essays and national design awards published by the Association of Collegiate Schools of Architecture ACSA Providing a primer on sustainability useful to teachers and students alike the selected essays address a broad range of issues Combined

with design projects that highlight issues holistically they promote an understanding of the principles of sustainability and further the integration of sustainable methods into architectural projects Using essays that alternately revise and clarify twentieth century architectural thinking *The Green Braid* places sustainability at the centre of excellent architectural design No other volume addresses sustainability within the context of architectural history theory pedagogy and design making this book an ideal source for architects in framing their practices and therefore their architectural production in a sustainable manner

*The Nature of Design* David W. Orr, 2004-10-14 The environmental movement has often been accused of being overly negative trying to stop progress *The Nature of Design* on the other hand is about starting things specifically an ecological design revolution that changes how we provide food shelter energy materials and livelihood and how we deal with waste Ecological design is an emerging field that aims to recalibrate what humans do in the world according to how the world works as a biophysical system Design in this sense is a large concept having to do as much with politics and ethics as with buildings and technology The book begins by describing the scope of design comparing it to the Enlightenment of the 18th century Subsequent chapters describe barriers to a design revolution inherent in our misuse of language the clockspeed of technological society and shortsighted politics Orr goes on to describe the critical role educational institutions might play in fostering design intelligence and what he calls a higher order of heroism Appropriately the book ends on themes of charity wilderness and the rights of children Astute yet broadly appealing *The Nature of Design* combines theory practicality and a call to action

*The Forestry Chronicle* ,1998      *Mother Jones Magazine* ,1997-09 *Mother Jones* is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues      **The Workbook** ,1996      *Mother Jones* ,1998      *The Publishers Weekly* ,2001      *Choice* ,1998
