Overview of chapter

This chapter provides an overview of the major activities of Australia's banks, building societies and credit unions. It describes the approach to regulation of financial institutions and the various agencies that regulate Australian depository institutions. DIs rely heavily on retail deposits to fund their activities, although wholesale borrowing and offshore funding are increasingly important sources of funds, particularly for the major banks. Historically, banks have offered a full range of services to both retail and corporate customers and Australia's major banks concentrate much of their effort in the provision of banking and investment banking services to businesses. Building societies and credit unions, on the other hand, focus on retail business, with loan portfolios dominated by residential mortgage lending. These differences are being eroded due to competitive forces, regulation and changing financial and business technology.

The Future of Finance Transformation: Leveraging AI, Analytics, and SAP Solutions for Enterprise Success 2025 Karan Shah, Dr. Bharti Kalra, PREFACE

The world of finance is undergoing a profound transformation. As businesses adapt to an increasingly complex and interconnected global economy, the traditional models of financial management, risk assessment and reporting are being challenged. Driven by rapid technological advancements, artificial intelligence (AI), advanced analytics and enterprise solutions like SAP are reshaping how organizations approach finance. These technologies are not merely enhancing existing practices; they are fundamentally changing the way businesses operate, make decisions and drive growth.

This book, *The Future of Finance Transformation: Leveraging AI, Analytics and SAP Solutions for Enterprise Success*, aims to provide an in-depth exploration of how emerging technologies are revolutionizing financial functions across industries. Each chapter presents practical use cases, real-world examples and actionable insights illustrating how organizations can leverage these technologies to improve their financial operations and create a more resilient, transparent and efficient business.
