Outlandish gags and pranks of submarine skippers are included showing just how brazen this elite group of super competent sailors could be
The reader travels through World War II and the Cold War as submarines and torpedoes enter the nuclear age
The book is filled with diagrams and illustrations **Scientific and Technical Aerospace Reports**, 1977

Fuzzy Logic with Engineering Applications Timothy J. Ross, 2004-08-16
Fuzzy logic refers to a set of methods used to characterize and quantify uncertainty in engineering systems
This edition covers major advances that have been made with regard to both theory and applications **Robot Intelligence Technology and Applications 2012** Jong-Hwan Kim, Eric T. Matson, Hyun Myung, Peter Xu, 2013-04-03
In recent years robots have been built based on cognitive architecture which has been developed to model human cognitive ability
The cognitive architecture can be a basis for intelligence technology to generate robot intelligence
In this edited book the robot intelligence is classified into six categories: cognitive intelligence, social intelligence, behavioral intelligence, ambient intelligence, collective intelligence, and genetic intelligence
This classification categorizes the intelligence of robots based on the different aspects of awareness and the ability to act deliberately as a result of such awareness
This book aims at serving researchers and practitioners with a timely dissemination of the recent progress on robot intelligence technology and its applications based on a collection of papers presented at the 1st International Conference on Robot Intelligence Technology and Applications RiTA held in Gwangju, Korea, December 16-18, 2012
For a better readability, this edition has the total 101 papers grouped into 3 chapters: Chapter I Cognitive Intelligence, Social Intelligence, and Behavioral Intelligence; Chapter II Ambient Intelligence, Collective Intelligence, and Genetic Intelligence; Chapter III Intelligent Robot Technologies and Applications **Advanced Human-Robot Collaboration in Manufacturing** Lihui Wang, Xi Vincent Wang, József Váncza, Zoltan Kemény, 2021-06-10
This book presents state of the art research challenges and solutions in the area of human robot collaboration (HRC) in manufacturing
It enables readers to better understand the dynamic behaviour of manufacturing processes and gives more insight into on demand adaptive control techniques for industrial robots
With increasing complexity and dynamism in today's manufacturing practice, more precise, robust, and practical approaches are needed to support real time shop floor operations
This book presents a collection of recent developments and innovations in this area, relying on a wide range of research efforts
The book is divided

into five parts The first part presents a broad based review of the key areas of HRC establishing a common ground of understanding in key aspects Subsequent chapters focus on selected areas of HRC subject to intense recent interest The second part discusses human safety within HRC The third fourth and fifth parts provide in depth views of relevant methodologies and algorithms Discussing dynamic planning and monitoring adaptive control and multi modal decision making the latter parts facilitate a better understanding of HRC in real situations The balance between scope and depth and theory and applications means this book appeals to a wide readership including academic researchers graduate students practicing engineers and those within a variety of roles in manufacturing sectors
