Babbitt, Jane E. Kister, This collection of reprinted Featured Reviews published

in Mathematical Reviews MR in 1995 and 1996 makes widely available informed reviews of some of the best mathematics published recently. Featured Reviews were introduced in MR at the beginning of 1995 in part to provide some guidance to the current research level literature. With the exponential growth of publications in mathematical research in the first half century of MR it had become essentially impossible for users of MR to identify the most important new research level books and papers especially in fields outside of the users own expertise. This work identifies some of the best new publications papers and books that are expected to have a significant impact on the area of pure or applied mathematics with which researchers are concerned. All of the papers reviewed here contain interesting new ideas or applications, a deep synthesis of existing ideas or any combination of these. The volume is intended to lead the user to important new research across all fields covered by MR.

College Algebra Cynthia Y. Young, 2021-07-07 Cynthia Young's College Algebra 5th Edition helps students take the guesswork out of studying by offering them an easy to read and clear roadmap that tells them what to do, how to do it, and whether they did it right.
