Digitally improving the identification of aquatic macroinvertebrates for indices used in biomonitoring Koen, R. C. J., Koen, F. J., Pattinson, N. B., Dickens, Chris W. S., Graham, P. M., 2023-12-31 This report provides an overview of the mini Stream Assessment Scoring System miniSASS and South African Scoring System Version 5 SASS5 as biomonitoring techniques for assessing the ecological condition of streams and rivers based on the identification of aquatic macroinvertebrates While miniSASS relies on minimally trained citizen scientists to identify macroinvertebrates at the Order level SASS5 utilizes expertly accredited practitioners for finer resolution even up to the family level However the reliance on citizen scientists for miniSASS identification introduces limitations in terms of precision accuracy and reliability To address these limitations ongoing developments within the CGIAR Initiative on Digital Innovation include the creation of a miniSASS smartphone application an upgraded website an interactive online course and a machine learning identification algorithm to assist with photo identification Additionally a revised dichotomous key has been developed to improve operator identification during miniSASS surveys Furthermore the potential for upscaling the machine learning identification algorithm to assist in identifying the 91 family level taxa used in SASS5 assessments has been explored The outcomes of these developments and explorations presented in this paper aim to enhance the overall effectiveness and reliability of both the miniSASS and SASS5 techniques By leveraging digital innovation and incorporating machine learning technology we anticipate the efficiency accuracy and accessibility of biomonitoring assessments will significantly improve ultimately contributing to a better understanding and management of our aquatic ecosystems

Biology for the IB Diploma Third edition C. J. Clegg, Andrew Davis, 2023-05-05 Developed in cooperation with the International Baccalaureate Trust experienced and best selling authors to navigate the new syllabuses confidently with these coursebooks that implement inquiry based and conceptually focused teaching and learning Ensure a continuum approach to concept based learning through active student inquiry our authors are not only IB Diploma experienced teachers but are also experienced in teaching the IB MYP and have collaborated on our popular MYP by Concept series Build the skills and techniques covered in the Tools Experimental techniques Technology and Mathematics with direct links to the relevant parts of the syllabus these skills also provide the foundation for practical work and internal assessment Integrate Theory of Knowledge into your lessons with TOK boxes and Inquiries that provide real world examples case studies and questions The TOK links are written by the author of our bestselling TOK coursebook John

Sprague and Paul Morris our MYP by Concept series and Physics co author Develop approaches to learning with ATL skills identified and developed with a range of engaging activities with real world applications Explore ethical debates and how scientists work in the 21st century with Nature of Science boxes throughout Help build international mindedness by exploring how the exchange of information and ideas across national boundaries has been essential to the progress of science and illustrates the international aspects of science Consolidate skills and improve exam performance with short and simple knowledge checking questions exam style questions and hints to help avoid common mistakes Practical Zoology I Mr. Rohit Manglik,2024-07-06 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels
