Off = The unit has no AC power.
Ethernet	Solid Green = Powered device connected to the associated port (includes devices with wake-on-LAN capability where a slight voltage is supplied to the Ethernet connection). Flickering Green = Activity seen from devices associated with the port. The flickering of the light is synchronized to actual data traffic. Off = The device is not powered, no cable or no powered devices connected to the associated ports.
Wireless	Solid Green = WIFI is powered. Flickering Green = Activity seen from devices connected via WIFI. The flickering of the light is synchronized to actual data traffic. Off = The device is not powered or no powered devices connected to the associated ports.
Wi-Fi Setup	Flickering Green = Indicates when WPS is broadcasting. Off = not in use, not broadcasting.
Broadband	Solid Green = Good broadband connection (i.e., good DSL Sync). Flashing Green = Attempting broadband connection (i.e., DSL attempting sync). Flashing Green & Red = If the broadband connection fails to be established for more than three consecutive minutes the LED switches to Flashing Green when attempting or waiting to establish a broadband connection alternating with a five second steady Red. This pattern continues until the broadband connection is successfully established. Flashing Red = No DSL signal on the line. This is only used when there is no signal, not during times of temporary 'no tone' during the training sequence. Off = The device is not powered.
