Race in Education Gerhard Mare, 2019-05-31 There is global evidence that the ghostly notions of essentialist differences between human groups continue to haunt in various forms. People draw upon ideas of religion, race, ethnicity, gender and sexuality and nation to draw distinctions. Racism, xenophobia, sexism and right wing populism are ongoing and increasing phenomena. In addition, genetic science has introduced new forms of evidence which lends itself to misuse to confirm the common sense perceptions. The valuable contributions of the authors in this publication not only warn against such notions but offer ways of exploring, exposing and challenging the ghosts and the fears engendered through their contemporary forms. On Campus University of the Western Cape, 2000 **Announcer** American Association of Physics Teachers, 2001 **Who's who of Southern Africa**, 2006 Vols for 1967-70 include as a section Who's who of Rhodesia, Mauritius, Central and East Africa. Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Lorna Holtman, 2008 Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers. These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries. But is providing access to institutions enough? Students in developing countries often come from school environments lacking in resources, human, physical and financial. This book in a number of chapters reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve their chances of success. A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as research methods, access, curriculum, instruction and assessment and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho. This volume provides invaluable insights and will be of relevance to researchers, policy makers and lecturers interested in these research outcomes in Sub-Saharan Africa. It is the outcome of a doctoral research capacity development project, the Graduate Studies in Science, Mathematics and Technology Education GRASSMATE. *Year of Fire, Year of Ash* Baruch Hirson, 2016-06-15 We can say without fear of being contradicted by history that June 16, 1976 heralded the beginning of the end of the centuries-old white rule in this country. Nelson Mandela. Originally banned on publication by the apartheid government, *Year of Fire, Year of Ash* is an eye-opening account of how in June 1976, 20,000 school students faced down the tanks and guns of a vicious racist regime in a revolt that galvanized the black working class and became a pivotal turning point for the anti-apartheid movement. More than this, the book overturns much of the conventional logic that served to explain the event at the time, showing it was not simply a student protest but part of a wider uprising. Released in this new edition to mark the fortieth anniversary, *Year of Fire, Year of Ash* provides an unparalleled insight into the origins and events of the uprising from its antecedents in the 1920s to its role in inspiring global solidarity against apartheid.
