Environmental Science and Information Application Technology David Chan, 2015-06-29 Environmental Science and Information Application Technology contains selected papers from the 2014 5th International Conference on Environmental Science and Information Application Technology ESIAT 2014 Hong Kong 7-8 November 2014. The book covers a wide variety of topics: Global Environmental Change and Ecosystems Management, Graphic and I **Afrotropical Streams and Rivers** Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure, Ecological Processes, and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa. Unlike other books available, the editors present a thorough study of geomorphological, hydrological, biological, and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them. This book, edited by a diverse cohort of researchers and/or scholars, is intended as an educational and practical guide for graduate students, researchers, and scientists who focus on the biodiversity conservation and management policy issues of the African river systems. Provides a comprehensive introduction to African freshwater rivers, their biota, and abiotic processes. Contains unique case studies on African streams and rivers. Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent. *The 2015 Regional Forecast and Urban Development Patterns* Sonny Conder, 1964 *Water Management in Megacities* Cecilia Tortajada, Olli Varis, Asit K. Biswas, Jan Lundqvist, 2013-09-13 Efficient and equitable water, wastewater, and stormwater management for the megacities is becoming an increasingly complex task. The special issue will focus on water management in its totality for megacities, including their technical, social, economic, legal, institutional, and environmental dimensions through a series of specially invited case studies from different megacities of the world. At present, around one out of two of the earth's 6.3 billion people live in urban areas. Each year, the world population grows by around 80 millions. Practically all of this growth is urban, primarily due to migration. World's urban population is expected to reach 5 billion by 2030, which is nearly 2/3rd more than in 2000 and would mean that 60% of world's population will live in urban areas. The case studies analysed include some of the most interesting and challenging megacities of this planet: Dhaka, Istanbul, Jakarta, Johannesburg, Mexico City, Riyadh, and São Paulo. They assess different aspects of how water is intermingled in the overall development milieu. The special issue will consider the magnitudes, nature, and extent of the present and future challenges and how these could be met in socially

acceptable and cost effective ways The contributors are all acknowledged water experts from different parts of the world This book was previously published as a special issue of the International Journal of Water Resource s Development

Social Constructions of Water Quality in South Africa Suvania Naidoo,2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government

including Nelson Mandela who became South Africa's first black president after serving years in prison *Non-Western Identity* Byron G. Adams, Fons J. R. van de Vijver, 2022-02-02 Identity is a construct strongly rooted and still predominantly studied in Western or WEIRD Western educated industrialized rich and democratic contexts e.g. North American and Western European. Only recently has there been more of a conscious effort to study identity in non-Western or non-WEIRD contexts. This edited volume investigates identity from primarily a non-Western perspective by studying non-Western contexts and non-Western minority or immigrant groups living in Western contexts. The contributions a) examine different aspects of identity e.g. personal identity, social identity, online identity as either independent or interrelated constructs; b) consider the associations of these constructs with aspects of intergroup relations, acculturative processes and/or psychological well-being; c) document the advancement in research on identity in underrepresented groups, contexts and regions such as Africa, Asia, Eastern Europe, the Middle East and South America; and d) evaluate different approaches to the study of identity and the implications thereof. This book is intended for cultural or cross-cultural academics, practitioners, educators, social workers, postgraduate students, undergraduate students and scholars interested in studying identity. It provides insight into how identity in non-Western groups and contexts may both be informed by and may inform Western theoretical perspectives.
