*Positioning the Brand* Rik Riezebos, Jaap van der Grinten, 2012-03-15 Positioning is hot Not only in the realm of consumer goods manufacturers but also for other companies institutions governments and even individual persons An explosion of good quality products on the market and targeted media and advertising campaigns has led to an increasing interest from organizations as to how to strategically position their brand Up to now only a few books on positioning were published Positioning the Brand picks up the gauntlet with an approach based on two fundamental choices Firstly the book was written from the perspective of the brand manager and has therefore been shaped as a practical roadmap Secondly this book advocates a new stance on positioning teaching the reader to look from the inside out instead of adopting the usual outside in methodology This inside out approach departs from an analysis of the corporate identity enabling better fulfilment of external positioning and ensuring internal support This book is intended for future managers marketing professionals and communication professionals responsible for the commercial success and reputation of a brand The contents have a practical set up reinforced by engaging examples and enable the reader to individually complete a positioning process **Yamaha**
