Tasks Set 1

The Amazon Rainforest Comprehension Task

The Amazon Rainforest is the largest tropical rainforest in the world. It is home to millions of plants and animals, many of which are found nowhere else. The rainforest covers parts of several countries, including Brazil, Peru, and Colombia.

The Amazon is often called the "lungs of the Earth" because it produces a large amount of oxygen. It also absorbs carbon dioxide, which helps to combat climate change. Unfortunately, the rainforest is facing many threats, including deforestation and climate change. People cut down trees for wood and to create space for farms and cities. This destroys the homes of many animals.

To help protect the Amazon, the trees and animals, we can:

1. Why might the Amazon rainforest be important?

2. Name three countries where the Amazon rainforest is located.

3. What do you think might happen if the Amazon rainforest was destroyed?

4. In one sentence, describe what you think the Amazon rainforest is like.

5. What does the word "deforestation" mean?

6. How might educating people about the Amazon rainforest help protect it?

7. Some ancient people might have painted animals on cave walls to show what they hunted or as part of their beliefs and stories.

The Invention of Cars

1. Karl Benz invented what is considered the first modern car in 1886.
2. "Inventor" means someone who creates or designs something new.
3. People were unsure about using cars at first because they were noisy and expensive, and they were not used to this new way of traveling.
4. In the future, cars might become even more advanced, possibly running on electricity or other clean energy sources, and they may even drive themselves.
5. The invention of cars made it easier and faster for people to live farther from their jobs and help them to live better.
6. Roads and cities began to grow because more people needed better ways to travel and get around.

Pollution in the Ocean

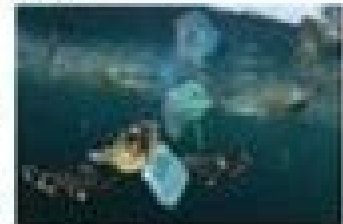

1. Things like plastic, chemicals, and rubbish can cause pollution in the ocean.
2. "Pollution" means harmful things like rubbish that make the environment dirty and unsafe.
3. Plastic is a big problem because it doesn't break down easily, so it stays in the ocean for a long time.
4. If people do not stop polluting the ocean, it could become too dirty for animals to live in.
5. Pollution hurts ocean animals because they eat plastic, which makes them sick or even kills them.
6. People are trying to clean up beaches and use less plastic to keep the water safe and clean for everyone.

The Great Wall of China

1. The Great Wall of China was built to protect the country from invaders.
2. "Invaders" means people who try to enter a country without being invited.
3. Building the Great Wall was difficult because it was long and built on steep mountains, and it took many years to complete.
4. If the Great Wall is not taken care of, it will become damaged over time.
5. The Great Wall of China is important because it is a symbol of China's history and a UNESCO World Heritage Site.
6. People visit the Great Wall today to learn about Chinese history and to see one of the most famous landmarks in the world.

Pollution in the Ocean

The ocean is home to many creatures, from tiny fish to huge whales. Unfortunately, our oceans are becoming polluted. Pollution is when harmful things like plastic, chemicals, or rubbish end up in the water. This pollution can come from factories, farms, and even from the rubbish we throw away. Sometimes, the wind blows litter into rivers, which carry it to the sea.

One of the biggest problems is plastic. Plastic does not break down easily, so it stays in the ocean for a long time. Animals like turtles and seabirds can mistake plastic for food and eat it. This can make them very sick or even cause them to die.

Many people are working hard to clean up the oceans. They are trying to stop pollution by recycling, using less plastic, and cleaning up beaches. If we all help, we can make a difference and protect the creatures that live in the ocean.

Questions

1. What kinds of things cause pollution in the ocean?

2. What does the word "pollution" mean in the text?

3. Why is plastic such a big problem for the animals in the ocean?
