

Unique Lens Operation

Support Wide-angle Fujinon 1.6x Zoom Lens

The PHS6-EX18 is equipped with a high-quality, high-definition Fujinon 1.6x zoom lens specifically designed to offer optimum picture performance and unprecedented functionality.

The lens offers a wide viewing angle (of 5.8mm equivalent to 35.4 mm on a 35mm lens), and many convenient features for diverse shooting situations.

Unique Focus Ring Mechanism - Professional Manual Focus and Auto Focus

The lens adopts a unique focus ring mechanism, offering two types of Manual Focus and Auto Focus. The lens has two independent focus adjustment systems, which can be switched by sliding the focus ring back and forth.

When the focus ring is in the front position, the lens works as an auto focus lens. Either Manual or Auto Focus mode can then be selected using the AF/MF switch on the lens. When the focus ring is set to the back position, the lens has an absolute focus position.

This lens is also equipped with independent rings for zoom and iris adjustment with stops and markings for precise adjustments, the rotation, rotation range, and level are identical to other premium high-end HD lenses. This gives users a high level of flexibility and operational comfort.

AF Assist

The AF (Auto Focus) Assist function of the PHS6-EX18 enables operators to instantly change focus positions using the focus ring in AF mode. This means that AF reference focus positions can be shifted manually to a new position.

MF Assist

The MF (Manual Focus) Assist function of the PHS6-EX18 helps to precisely focus on the target subject when shooting in MF mode. When MF Assist is enabled, auto focus is momentarily canceled when the user stops adjusting the focus ring. The camera then briefly focuses on the subject placed in the focal point of the lens at that time.

One-push Auto to

A One-push Auto to button on the lens of the PHS6-EX18 allows the user to go into Auto to mode only when the button is pushed.

Optical Image Stabilizer

Incorporated in the lens, this minimizes the blurring effect caused by a shaking hand.

Expanded Focus

At the touch of a button, the center of the screen on the LCD monitor and viewfinder of the PHS6-EX18 can be magnified to about twice normal size, making it easier to confirm focus settings during manual focusing.

Selection Peeking

The Peeking function of the PHS6-EX18 can help operators to quickly and accurately adjust the camera focus by offering the video pictures on display on the LCD monitor and viewfinder to can enhance the outline of the image which the camera focuses on most and change its outline to make it stand out. Enhancement levels can be selected from three levels and the outline color from four colors.
