Using The Dsi As A Guide Camera:

Choosing and Using a New CAT Rod Mollise,2009-02-28 Choosing and Using the New CAT will supersede the author's successful Choosing and Using a Schmidt Cassegrain Telescope which has enjoyed enthusiastic support from the amateur astronomy community for the past seven years. Since the first book was published a lot has changed in the technology of amateur astronomy. The sophistication and variety of the telescopes available to amateurs has increased dramatically. Computerized SCTs Maksutov Cassegrains and most recently Meade's new and acclaimed Ritchey Chr tiens have come to dominate the market. That means that all amateurs considering the purchase of a new telescope not only a SCT and not just beginners will benefit from this detailed guide. Choosing the right telescope for particular kinds of observation or even for general work is far from easy but Rod Mollise gives invaluable advice and guidance. The Ultimate Guide to Using ICT Across the Curriculum (For Primary Teachers) Jon Audain,2014-05-22 WHEN IT COMES TO USING TECHNOLOGY IN THE CLASSROOM ARE YOU a nervous beginner in need of tips for getting started an expert user searching for some high tech creative activities an ICT coordinator looking for advice on how to plan and implement your school provision. With the implementation of the new Primary Computing curriculum is the definitive guide to embedding ICT in all subjects across the primary school. From using digital cameras and Beebots to Twitter and mobile apps the creative and up to date ideas in this book will motivate and engage your pupils and prepare them for the changing world of technology they are living in. As well as step by step instructions on how to use a variety of technologies effectively this book covers e safety and the digital child planning and budgeting your provision and how to use technology to support children with special educational needs. The Urban Astronomer's Guide Rod Mollise,2006-12-22 Most amateur astronomers yearn to observe more frequently. Many of them however live in urban and highly developed suburban areas that are heavily light polluted. Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home. This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season. This book covers the why how and what of astronomy under light polluted skies. The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and moderns techniques and what to observe. About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs. The Astrophotography Manual Chris Woodhouse,2015-05 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae galaxies clusters and the solar system. Beginning with a brief astronomy primer this book takes readers through the full astrophotography process from choosing and using equipment through image capture calibration and processing. This combination of technical background

information and the hands on approach brings the science down to earth with a practical method to plan for success Features include Over 400 images graphs and tables to illustrate these concepts A wide range of hardware to be used including smartphones tablets and the latest mount technologies How to utilize a variety of leading software such as Maxim DL Nebulosity Sequence Generator Pro Photoshop and PixInsight Case studies showing how and when to use certain tools and overcoming technical challenges How sensor performance and light pollution relate to image quality and exposure planning

[Meade LXD55 and LXD75 Telescopes](#) Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud

owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

Jeffrey L. Hopkins,2013-11-19 Amateur astronomers interested in learning more about astronomical spectroscopy now have the guide they need It provides detailed information about how to get started inexpensively with low resolution spectroscopy and then how to move on to more advanced high resolution spectroscopy Uniquely the instructions concentrate very much on the practical aspects of using commercially available spectroscopes rather than simply explaining how spectroscopes work The book includes a clear explanation of the laboratory theory behind astronomical spectrographs and goes on to extensively cover the practical application of astronomical spectroscopy in detail Four popular and reasonably priced commercially available diffraction grating spectrographs are used as examples The first is a low resolution transmission diffraction grating the Star Analyser spectrograph The second is an inexpensive fiber optic coupled bench spectrograph that can be used to learn more about spectroscopy The third is a newcomer the ALPY 600 spectrograph The fourth spectrograph considered is at the other end of the market both in performance and cost the high resolution Lhires III While considerably more expensive this is a popular and excellent scientific instrument that allows more advanced amateur astronomers to produce scientifically valuable data With all of these tools in place the amateur astronomer is well prepared to forger deeper into the night sky using spectroscopy **Star Ware** Philip S. Telescope! Lawrence Harris,2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been They are surely all correct The great leap of our time is that computer designed and machined parts have led to more accurately made com nents that give the astronomer ever better views The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker The new products did not end the work of craftsman te scope makers though Many highly skilled amateur

professional opticians continued to produce good quality mirrors that are still seen today. Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals. This has greatly increased the possibilities of serious astronomy projects for which tailor made software has been developed. Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1.1. Look Before You Leap. But first a word of caution. Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a well featured telescope. Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest.
