Universities receive countless applications, and each essay must captivate the reader's attention from the outset. Crafting a compelling narrative that not only reflects your academic achievements but also showcases your character and personal growth is no small feat.

Furthermore, the pressure to adhere to word limits while conveying a comprehensive picture of yourself can be daunting. Selecting the right experiences and anecdotes to include, and ensuring that each word serves a purpose, requires careful consideration and editing.

Decision-Making Experiments under a Philosophical Analysis: Human Choice as a Challenge for Neuroscience Gabriel José Corrêa Mograbi, Carlos Eduardo Batista de Sousa, 2015-10-15. This introduction just aims to be a fast foreword to the special topic now turned into an e-book. The Editorial Decision Making Experiments under a Philosophical Analysis: Human Choice as a Challenge for Neuroscience alongside with my opinion article Neurophilosophical considerations on decision making. Pushing up the frontiers without disregarding their foundations, play the real role of considering in more details the articles and the whole purpose of this e-book. What I must highlight in this foreword is that our intention with such a project was to deepen into the very foundations of our current paradigms in decision neuroscience and to philosophically moot its foundations and repercussions. Normal Science, a term coined by philosopher Thomas Kuhn, works under a research consensus among a scientific community. A shared paradigm consolidated methods, widespread convictions. Pragmatically winning formulas must be kept, although not at any cost. What differentiates a gifted and revolutionary scientist from a more bureaucratic colleague is the capacity and willingness of constantly reevaluating, depurating, and refining his/her own paradigm. That is the best strategy to avoid that a paradigm itself would gradually come under challenge. In my view, some achievements in this sense were brought about in our project. The e-book will be inspiring and informative for both neuroscientists that are concerned with the very foundations of their works and for philosophers that are not blind to empirical evidence. Kant once said: Thoughts without content are empty; intuitions without concepts are blind. Paraphrasing Kant, we could say: Philosophy without science is empty; science without philosophy is blind.
