I believe that the E Symposium on Industrial and Systems Engineering should promote an integrated learning environment for an interdisciplinary approach through its academic advisory programs that provide mathematics, statistics, and computer systems as additional rather than engineering subjects. Mathematical concepts have been applied in previous master's degree programs where students learned how to bring the engineering and technological changes in mathematics. I believe that it is essential to provide the opportunity to expand on the knowledge I was introduced to as a high school. I am excited to be able to provide a new learning system in the E Symposium on Industrial and Systems Engineering through the integration of the academic knowledge and my personal/communitary values as members of an interdisciplinary community.
