Kearney, 2015-06-21 This introductory guide to ABA demystifies the often complex terminology the underlying principles and commonly used procedures of ABA using accessible everyday language This revised and updated edition reflects recent developments and introduces new key terms Albert J Kearney explains the kinds of learning and reinforcement processes that form the basis of ABA programs Having covered these essential principles he describes how the science of behavior analysis can be effectively applied to real life behavior problems He looks at how behavior is assessed and various intervention techniques that are often employed with children who have autism and other special needs Having laid these essential foundations Kearney touches on more advanced topics the applications of ABA in behavioral education such as precision teaching and programmed instruction

Hands-On Math Janet Stone, 1990-06 One hundred twenty one manipulative math experiences help children discover concepts naturally Uses easy to find materials Includes take home projects to stimulate parent child interaction

Engaging in Culturally Relevant Math Tasks, 6-12 Lou Edward Matthews, Shelly M. Jones, Yolanda A. Parker, 2022-12-01 Empower your students as they reimagine the world around them through mathematics Culturally relevant mathematics teaching engages students by helping them learn and understand math more deeply and make connections to themselves their communities and the world around them The mathematics task provides opportunities for a direct pathway to this goal But many teachers ask how can you find adapt and implement math tasks that build powerful learners Engaging in Culturally Relevant Math Tasks helps teachers to design and refine inspiring mathematics learning experiences driven by the kind of high quality and culturally relevant mathematics tasks that connect

students to their world With the goal of inspiring all students to see themselves as doers of mathematics this book provides intensive in the moment guidance and practical classroom tools that empower educators to shape culturally relevant experiences while systematically building tasks that are standards based It includes A pathway for moving through the process of asking imagining planning creating and improving culturally relevant math tasks Tools and strategies for designing culturally relevant math tasks that preservice novice and veteran teachers can use to grow their practice day by day Research based teaching practices seen through the lens of culturally relevant instruction that help students develop deep conceptual understanding procedural knowledge fluency and application in 6 12 mathematical content Examples milestones opportunities for reflection and discussion questions guide educators to strengthen their classroom practices and to reimagine math instruction in response This book is for any educator who wants to teach mathematics in a more authentic inclusive and meaningful way and it is especially beneficial for teachers whose students are culturally different from them

Burn Math Class Jason Wilkes, 2016-03-22 A manifesto for a mathematical revolution Forget everything you've been taught about math In *Burn Math Class* Jason Wilkes takes the traditional approach to how we learn math with its unwelcoming textbooks unexplained rules and authoritarian assertions and sets it on fire Focusing on how mathematics is created rather than on mathematical facts Wilkes teaches the subject in a way that requires no memorization and no prior knowledge beyond addition and multiplication From these simple foundations *Burn Math Class* shows how mathematics can be re-invented from scratch without preexisting textbooks and courses We can discover math on our own through experimentation and failure without appealing to any outside authority When math is created free from arcane notations and pretentious jargon that hide the simplicity of mathematical concepts it can be understood organically and it becomes fun Following this unconventional approach *Burn Math Class* leads the reader from the basics of elementary arithmetic to various advanced topics such as time dilation in special relativity Taylor series and calculus in infinite dimensional spaces Along the way Wilkes argues that orthodox mathematics education has been teaching the subject backward calculus belongs before many of its so called prerequisites and those prerequisites cannot be fully understood without calculus Like the smartest craziest teacher you've ever had Wilkes guides you on an adventure in mathematical creation that will radically change the way you think about math Revealing the beauty and simplicity of this timeless subject *Burn Math Class* turns everything that seems difficult about mathematics upside down and sideways until you understand just how easy math can be
