

3rd NEWTON LAW

Reaction = Normal Force

Action = Book weight

Newton's Third Law, also known as the Law of Action and Reaction, states that for every action, there is an equal and opposite reaction.

This means that if object A exerts a force on object B, object B will exert a force of equal magnitude but in the opposite direction on object A.

This law is fundamental to understanding interactions between objects and how forces act in reciprocal pairs, contributing to stability and motion in the physical universe.
