The study The Non verbal Type of Small Clauses in English and Lithuanian is one of the first attempts to apply the methods of generative grammar to the analysis of a fragment of Lithuanian grammar i e constructions with secondary predicates of the type V NP1 NP2 and V NP1 AP the sub strings NP1 NP2 and NP1 AP of which in generative works are usually called small clauses The investigation is contrastive the evidence of Lithuanian is compared with that of English Whereas the syntactic study of secondary predicates in English has a certain tradition traditional Lithuanian grammar does not have a single notion to what is known elsewhere as secondary predicates In Lithuanian traditional grammar secondary predicates are usually referred to as a part of compound nominal predicates predicative attributes a part of complex objects and are not singled out as a distinct category but are given different often contradictory treatments Thus the research can be considered pioneering work as far as Lithuanian is concerned It not only contributes to the theoretical discussion about the adequate way of dealing with secondary predicates in Government and Binding framework but can also be considered instrumental in propagating modern methods of syntactic analysis in tradition ridden Lithuanian grammar The present work addresses an important problem whether the Lithuanian and English constructions under investigation express a subject predicate relationship and form a constituent and can be described as having the syntactic function of a clause For this purpose the syntactic and semantic as well as clausal properties of the sequences NP1 NP2 and NP1 AP in the two languages under consideration are discussed The clausal properties of the sub strings NP1 NP2 and NP1 AP are investigated on the basis of the presence of agreement features sentence negation the resemblance to full clauses theta role assignment word order and applying sentence constituency tests

Sheepdog is never happier than when at the center of attention or in the middle of the action First appearing in the mid 1700 s this comparative newcomer to the canine world was originally bred for the tough life of a drover in Southwest England Here they were responsible for driving sheep and cattle to market It was at this time that they picked up the nickname Bob Tails because of their docked tails which identified them as working dogs and allowed their owners to avoid paying pet tax Tasked with guarding and moving sheep and cattle across windswept moors and dales they are doubly blessed with brain and brawn Their loyalty and companionship are beyond reproach but it is the breed s sense of fun that is as strongly imprinted in their DNA as their instinct to herd The Old English Sheepdog is often called the clown prince of dogs which is a great indication of the indelible imprint he leaves on owners and breeders alike A large breed adult Old English Sheepdogs reach around 21 22 at the shoulder and weigh as much as 80 pounds Hugely affectionate and attention seeking they will never be far from their owner s side So if personal space is high on your list of priorities this may not be the ideal breed for you As long as an OES is part of the family it doesn t matter if you live in a penthouse or a farmhouse What does matter though is exercise and lots of it Be aware this love of human company also means that your new best friend will not make a good yard dog Everything about this breed is larger than life from their abundant shaggy coat to their outgoing quirky character They also live to around 12 years of age so making this affable breed of dog a member of the family is a long term commitment For all these reasons knowledge of this large breed is essential before committing to welcoming one into your family Are you intending to go down the puppy route or maybe offering a loving home to a rescue dog Then the chapters of this guide will provide you with all the information you need to get the best from your big bouncy bob tail
