Malkowski,2010-05-14 A view into the sophisticated and highly advanced civilization that preceded the world of the pharaohs Presents historical evidence of the civilization ruled by the gods that the Egyptians claimed preceded their own Explains who these prehistoric people were what happened to them and why they built a series of pyramids along the west bank of the Nile River Traditional Egyptologists have long resisted the notion that the architectural achievements of the Ancient Egyptians required the existence of a much more sophisticated technology than would have existed at that time Yet no records exist explaining how why or who built Egypt s megalithic monuments and statues The ancient Egyptians did however record that their civilization resided in the shadow of a kingdom of gods whose reign ended many thousands of years before their first dynasty What was this Civilization X that antiquity s most accomplished people revered as gods The recent discovery of a large stone at one of Egypt s oldest ruins presents physical evidence that clearly and distinctly shows the markings of a machining process far beyond the capabilities of the Ancient Egyptians Likewise experimental modeling of the Great Pyramid s subterranean chambers and passageways gives scientific evidence to further support the theory that the civilization responsible for such magnificent monuments is much older than presently believed Ancient Egypt 39 000 BCE examines this evidence from historical and technical points of view explaining who these prehistoric people were what happened to them why they built their civilization out of granite and why they built a series of pyramids along the west bank of the Nile River [The Advanced Civilization of Khemit {Egypt} in Antiquity](#) D. The Civilization Of Ancient Egypt

Paul Johnson, 2012-02-07 A leading historian and bestselling author re creates the growth decline and legacy of 3 000 Years of Egyptian civilization with an authoritative text splendidly illustrated with 150 illustrations in full color Ancient Egypt with its legacy of pyramids pharaohs and sphinxes is a land of power and mystery to the modern world In The Civilization of Ancient Egypt Paul Johnson explores the growth and decline of a culture that survived for 3 000 years and maintained a purity of style that rivals all others Johnson s study looks in detail at the state religion culture and geographical setting and how they combined in this unusually enduring civilization From the beginning of Egyptian culture to the rediscovery of the pharaohs the book covers the totalitarian theocracy the empire of the Nile the structure of dynastic Egypt the dynastic way of death hieroglyphs the anatomy of perspective art and finally the decline and fall of the pharaohs Johnson seeks through an exciting combination of images and analysis to discover the causes behind the collapse of this great civilization while celebrating the extra ordinary legacy it has left behind Paul Johnson on Ancient Egypt and the Egyptians Egypt was not only the first state it was the first country The durability of the state which thus evolved was ensured by the overwhelming

simplicity and power of its central institution the theocratic monarchy The Egyptians did not share the Babylonian passion for astrology but they used the stars as one of many guides to behavior No Egyptian believed in a free exercise of will in important decisions he always looked for an omen or a prophecy or an oracle The development of hieroglyphics mirrors and epitomizes the history of Egyptian civilization No one outside Egypt understood it and even within Egypt it was the exclusive working tool of the ruling and priestly classes The great mass of Egyptians were condemned to illiteracy by the complexities and also the beauties of the Egyptian written language The affection the Egyptians were not ashamed to display towards their children was related to the high status women enjoyed in Egyptian society If we can understand Egyptian art we can go a long way towards grasping the very spirit and outlook on life of this gifted people so remote in time The dynamic of their civilization seems to have been a passionate love of order maat to them by which they sought to give to human activities and creations the same regularity as their landscape their great river their sun cycle and their immutable seasons
