Sparc Architecture Manual:

The SPARC Architecture Manual SPARC International, 1992 This in depth guide to Version 8 SPARC a high speed RISC computer chip provides the reader with the background design philosophy high level features and implementations of this new model Includes an expanded index of terms for easy reference and a table of synthetic instructions added to the suggested assembly language syntax

The SPARC Architecture Manual SPARC International, 1994 SPARC Scalable Processor Architecture is the industry s only openly defined and evolved RISC architecture Version 9 is the new 64 bit incarnation of SPARC the most significant change since SPARC s introduction in 1987 Unlike other RISC Reduced Instruction Set Computer designs SPARC specifies not a hardware implementation chip but an open standard architecture belonging to the community of SPARC vendors and users The SPARC specification is defined by the SPARC Architecture Committee a technical arm of the computer maker consortium SPARC International Version 9 provides 64 bit data and addressing support for fault tolerance fast context switching support for advanced compiler optimizations efficient design for Superscalar processors and a clean structure for modern operating systems The V9 architecture supplements rather than replaces the 32 bit Version 8 architecture The non privileged features of Version 9 are upward compatible from Version 8 so 32 bit application software can execute natively without modification on Version 9 systems no special compatibility mode is required Publication of the Version 9 architecture marks a three year development effort by SPARC International member companies from a broad cross section of disciplines
