Intelligent Systems Design and Applications Ajith Abraham, Niketa Gandhi, Thomas Hanne, Tzung-Pei Hong, Tatiane Nogueira Rios, Weiping Ding, 2022-03-26 This book highlights recent research on intelligent systems and nature inspired computing It presents 132 selected papers from the 21st International Conference on Intelligent Systems Design and Applications ISDA 2021 which was held online The ISDA is a premier conference in the field of computational intelligence and the latest installment brought together researchers engineers and practitioners whose work involves intelligent systems and their applications in industry Including contributions by authors from 34 countries the book offers a valuable reference guide for all researchers students and practitioners in the fields of Computer Science and Engineering *Fundamentals of Speaker Recognition* Homayoon Beigi, 2011-12-09 An emerging technology Speaker Recognition is becoming well known for providing voice authentication over the telephone for helpdesks call centres and other enterprise businesses for business process automation Fundamentals of Speaker Recognition introduces Speaker Identification Speaker Verification Speaker Audio Event Classification Speaker Detection Speaker Tracking and more The technical problems are rigorously defined and a complete picture is made of the relevance of the discussed algorithms and their usage in building a comprehensive Speaker Recognition System Designed as a textbook with examples and exercises at the end of each chapter Fundamentals of Speaker Recognition is suitable for advanced level students in computer science and engineering concentrating on biometrics speech recognition pattern recognition signal processing and specifically speaker recognition It is also a valuable reference for developers of commercial technology and for speech scientists Please click on the link under Additional Information to view supplemental information including the Table of Contents and Index **Automatic Speech and Speaker Recognition** Joseph Keshet, Samy Bengio, 2009-04-27 This book discusses large margin and kernel methods for speech and speaker recognition Speech and Speaker Recognition Large Margin and Kernel Methods is a collation of research in the recent advances in large margin and kernel methods as applied to the field of speech and speaker recognition It presents theoretical and practical foundations of these methods from support vector machines to large margin methods for structured learning It also provides examples of large margin based acoustic modelling for continuous speech recognizers where the grounds for practical large margin sequence learning are set Large margin methods for discriminative language modelling and text independent speaker verification are also addressed in this book Key Features Provides an up to date snapshot of the current state of research in this field Covers important aspects of extending the binary support vector machine to speech and speaker recognition applications Discusses large margin and kernel method algorithms for sequence prediction required for acoustic modeling Reviews past and present work on discriminative training of language models and describes different large margin algorithms for the application of part of speech tagging Surveys recent work on the use of kernel approaches to text independent speaker verification and introduces the main concepts and algorithms Surveys recent work on kernel

approaches to learning a similarity matrix from data This book will be of interest to researchers practitioners engineers and scientists in speech processing and machine learning fields

AIXIA 2021 - Advances in Artificial Intelligence Stefania Bandini, Francesca Gasparini, Viviana Mascardi, Matteo Palmonari, Giuseppe Vizzari, 2022-07-18 This book constitutes revised selected papers from the refereed proceedings of the 20th International Conference of the Italian Association for Artificial Intelligence AIXIA 2021 which was held virtually in December 2021 The 36 full papers included in this book were carefully reviewed and selected from 58 submissions the volume also contains 12 extended and revised workshop contributions The papers were organized in topical sections as follows Planning and strategies constraints argumentation and logic programming knowledge representation reasoning and learning natural language processing AI for content and social media analysis signal processing images videos and speech machine learning for argumentation explanation and exploration machine learning and applications and AI applications

Human and Automatic Speaker Recognition over Telecommunication Channels Laura Fernández Gallardo, 2015-08-17 This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation codecs and electro acoustic user interfaces among other impairments Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth together with an insight into how speaker specific characteristics of speech are preserved through different transmissions It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths such as wideband and super wideband

Affective Computing and Intelligent Interaction Ana Paiva, Rui Prada, Rosalind W. Picard, 2007-09-04 This book constitutes the refereed proceedings of the Second International Conference on Affective Computing and Intelligent Interaction ACII 2007 It covers affective facial expression and recognition affective body expression and recognition affective speech processing affective text and dialogue processing recognizing affect using physiological measures computational models of emotion and theoretical foundations and affective sound and music processing

Guide to Biometric Reference Systems and Performance Evaluation Dijana Petrovska-Delacrétaz, Gérard Chollet, Bernadette Dorizzi, 2009-04-05 Biometrics has moved from using fingerprints to using many methods of assessing human physical and behavioral traits This guide introduces a new performance evaluation framework designed to offer full coverage of performance evaluation of biometric systems

Behavioral Biometrics for Human Identification: Intelligent Applications Wang, Liang, Geng, Xin, 2009-08-31 This edited book provides researchers and practitioners a comprehensive understanding of the state of the art of behavioral biometrics techniques potential applications successful practice and available resources Provided by publisher

Automatic Speech Recognition and Translation for Low Resource Languages L. Ashok Kumar, D. Karthika Renuka, Bharathi Raja Chakravarthi, Thomas Mandl, 2024-03-28 AUTOMATIC SPEECH RECOGNITION and TRANSLATION for LOW RESOURCE LANGUAGES This book is a comprehensive exploration into the cutting edge research methodologies and advancements in

addressing the unique challenges associated with ASR and translation for low resource languages Automatic Speech Recognition and Translation for Low Resource Languages contains groundbreaking research from experts and researchers sharing innovative solutions that address language challenges in low resource environments The book begins by delving into the fundamental concepts of ASR and translation providing readers with a solid foundation for understanding the subsequent chapters It then explores the intricacies of low resource languages analyzing the factors that contribute to their challenges and the significance of developing tailored solutions to overcome them The chapters encompass a wide range of topics ranging from both the theoretical and practical aspects of ASR and translation for low resource languages The book discusses data augmentation techniques transfer learning and multilingual training approaches that leverage the power of existing linguistic resources to improve accuracy and performance Additionally it investigates the possibilities offered by unsupervised and semi supervised learning as well as the benefits of active learning and crowdsourcing in enriching the training data Throughout the book emphasis is placed on the importance of considering the cultural and linguistic context of low resource languages recognizing the unique nuances and intricacies that influence accurate ASR and translation Furthermore the book explores the potential impact of these technologies in various domains such as healthcare education and commerce empowering individuals and communities by breaking down language barriers Audience The book targets researchers and professionals in the fields of natural language processing computational linguistics and speech technology It will also be of interest to engineers linguists and individuals in industries and organizations working on cross lingual communication accessibility and global connectivity

Contemporary Computing Sanjay Ranka,Srinivas Aluru,Rajkumar Buyya,Yeh-Ching Chung,Sandeep Gupta,Ananth Grama,Rajeev Kumar,Vir V. Phoha,Sumeet Dua,2009-08-19 This book constitutes the refereed papers of the 2nd International Conference on Contemporary Computing which was held in Noida New Delhi India in August 2009 The 61 revised full papers presented were carefully reviewed and selected from 213 submissions and focus on topics that are of contemporary interest to computer and computational scientists and engineers The papers are organized in topical sections on Algorithms Applications Bioinformatics and Systems

Statistical Language and Speech Processing Luis Espinosa-Anke,Carlos Martín-Vide,Irena Spasić,2020-09-25 This book constitutes the proceedings of the 8th International Conference on Statistical Language and Speech Processing SLSP 2020 held in Cardiff UK in October 2020 The 13 full papers presented together with one invited paper in this volume were carefully reviewed and selected from 25 submissions They papers cover the wide spectrum of statistical methods that are currently in use in computational language or speech processing

Hybrid Intelligent Systems for Pattern Recognition Using Soft Computing Patricia Melin,Oscar Castillo,2005-03-08 This monograph describes new methods for intelligent pattern recognition using soft computing techniques including neural networks fuzzy logic and genetic algorithms Hybrid intelligent systems that combine several soft computing techniques are needed due to the complexity of pattern recognition problems Hybrid

intelligent systems can have different architectures which have an impact on the efficiency and accuracy of pattern recognition systems to achieve the ultimate goal of pattern recognition This book also shows results of the application of hybrid intelligent systems to real world problems of face fingerprint and voice recognition This monograph is intended to be a major reference for scientists and engineers applying new computational and mathematical tools to intelligent pattern recognition and can be also used as a textbook for graduate courses in soft computing intelligent pattern recognition computer vision or applied artificial intelligence **Proceedings ENTERFACE 2007** Similar,2007 July 15 August 12 Bogazici University Campus eNTERFACE 07 took place in Istanbul at the campus of the Bogazici University The one month long workshop was attended by 140 people The workshop was organized around 12 well defined projects as the
