

Maintenance

NOTE: Before performing maintenance on the detector, notify the proper authorities and the central station that maintenance is being performed and the system will be temporarily out of service. Disable the zone or system undergoing maintenance to prevent any unwanted alarms, and follow this procedure exactly, referring to Figure 5.

1. Remove the detector housing from the base by twisting counter-clockwise.
2. Remove the battery from the unit.
3. Wait 20 seconds. (To ensure proper power-down sequence, the battery must be removed from detector for a minimum of 20 seconds before continuing to the next step.)
4. Remove the detector cover by turning counter-clockwise.
5. Vacuum the cover or use canned air to remove any dust or debris.
6. Remove the top half of the screen/sensing chamber by lifting straight up (see Figure 5).
7. Vacuum or use canned air to remove any dust or particles that are present on all chamber sections.
8. Replace the top half of the screen/sensing chamber by aligning the arrow on the screen/sensing chamber with the arrow on the housing. Press down firmly until the screen/sensing chamber is fully seated.
9. Replace the detector cover by placing it over the screen/sensing chamber and turning it clockwise until it snaps into place.

10. Reinstall the battery into the battery compartment noting proper orientation. The red and green LEDs will flash once every 5 seconds for approximately 20 seconds until the power-up cycle is complete.
11. Reinstall the detector and test (see the Testing section).
12. Notify the central station when the system is back in service.

IMPORTANT: If this procedure is not followed exactly, the detector may indicate a maintenance trouble after the power-up sequence is complete. If this happens, remove the battery for 20 seconds and then reinstall.
