World Development Report 2013 World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment

rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success

Advancing Rule of Law in a Global Context Heru Susetyo, Patricia Rinwigati Waagstein, Akhmad Budi Cahyono, 2020-02-25 The papers published in this proceedings volume are written by a selection of authors resulting from a call for papers for the 1st International Conference on Law and Governance in a Global Context ICLAVE originating from Indonesia and other countries This proceedings volume shall be a very valuable contribution to understand contemporary law issues in Indonesia which are not always taught in law schools These proceedings will not only serve as a useful reference for law students and academicians but also help law practitioners to understand law issues that may be encountered in Indonesia It covers selected items such as Administrative Law Constitutional Law Business Law Intellectual Property Law Criminal Law Human Rights Law Adat Law Shariah Law Judiciary Law and International Law which are all important for undergraduate and post graduate law students as well as academicians and law practitioners in the law community

Global report on teachers International Task Force on Teachers for Education 2030, UNESCO, 2024-02-24 Teachers are central to unlocking every learner s potential and achieving Sustainable

Development Goal 4 of inclusive equitable and quality education for all. Regrettably, worldwide teacher shortages have been endangering the future of education. New data collected for the Global Report on Teachers indicates that 44 million additional teachers are needed to achieve universal primary and secondary education by 2030. Shortages are widespread, with sub-Saharan Africa needing 15 million more teachers, while higher income countries face retention challenges resulting in teachers massively leaving the profession. Echoing calls from the International Commission on the Futures of Education and the 2022 Transforming Education Summit, this report advocates for dignifying, diversifying, and valorizing the teaching profession. It emphasizes the importance of improved working conditions, enhanced professional development, and increased teacher involvement in decision making to bridge the gap. This report is a tool to mobilize international and country efforts to empower, recruit, train, and support teachers within resilient education systems for a collaborative, innovative, and cohesive teaching profession. It is a roadmap aiming to elevate the status of the teaching profession and ensure quality education for all learners, urging immediate action.

The Health of Vietnam Anna G. Shillabeer, 2015-09-30. This book presents a detailed overview of the healthcare environment in Viet Nam. Given the general lack of understanding of healthcare in the Vietnamese context, it discusses the background and history, current status, and the future of healthcare in the country. The first part of the book provides a summary of the current state of Vietnamese healthcare, incorporating discussions on the training and professional practice environment and the development, implementation, and impact of national insurance policies. In addition, it highlights the cultural aspects of health provision and behaviours, technology integration, and health trends from a number of angles based on standard global reporting dimensions. The second part elaborates on the 5-year strategic plan for national healthcare management and the top 5 barriers to meeting these planned objectives. It documents key investors and project objectives and outcomes, as well as the top 10 health issues in Vietnam, including an overview of national and international initiatives to tackle these issues, addressing financial and social burdens in the process. In the third part, the book outlines the opportunities and barriers for improvement in healthcare outcomes for Viet Nam, providing evidence to support future work by local or international researchers. It is a fundamental text for anyone looking to work or research in the Vietnamese healthcare environment and provides an outline for project planning and targeted programs of work to achieve measurable improvements in Viet Nam.
