played central roles in historical architectural discourses Among the questions addressed How was the concept of form immanent in practices of scanning since the late nineteenth century What was the historical relationship between rendering and experience in Enlightenment discourses How did practices of specifying reconfigure the distinction between intellectual and manual labor What kind of rationality is inherent in the designer s constant clicking of the mouse in front of her screen In addressing these and other questions this engaging and timely collection thereby proposes technics as a site for historical and philosophical reflection not only for those engaged in architectural design but also for any scholar working in the humanities today Contributors Lucia Allais Edward Eigen Orit Halpern John Harwood Matthew C Hunter and Michael Osman

The Courthouse and the Depot Wilber W. Caldwell, 2001 Their songs insist that the arrival of the railroad and the appearance of the tiny depot often created such hope that it inspired the construction of the architectural extravaganzas that were the courthouses of the era In these buildings the distorted myth of the Old South collided head on with the equally deformed myth of the New South

Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane s *Influence on Architecture from 1791* A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean

disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture **Edward Shaw of Boston** James F.

Architecture in the United States, 1800-1850 William Barksdale Maynard,2002-01-01 This study traces the development of American architecture from the age of Jefferson to the antebellum era providing a survey of this important

period W Barksdale Maynard overturns the long accepted notions that the chief theme of early 19th century American architecture was a patriotic desire to escape from European influence and that competing styles chiefly reflected the American struggle for cultural uniqueness Instead deep and consistent aesthetic ties especially with England shaped American architecture and house designs Maynard shows that the Greek Revival in particular was an international phenomenon with American achievements inspired by British example and with taste taking precedence over patriotism
