Strategies for Teaching Mathematics Deborah V. Mink, Janis Drab Fackler, Linda H., 2009-07-15 Enhance mathematics instruction and build students' understanding of mathematical concepts with this practical research-based resource. Choose from a wide range of easy-to-implement strategies that enhance mathematics instruction, including developing students' mathematical vocabulary and problem-solving abilities, assessing students' mathematics thinking, and using manipulatives. Highlights include tips on planning instruction and managing the mathematics classroom, plus differentiation strategies for each lesson. This resource is correlated to College and Career Readiness and other state standards.

Navigating Through Problem Solving and Reasoning in Grade 6 Denisse Rubilee Thompson, 2009 Problem solving and reasoning are students' processes of actively applying what they know to new problems from diverse areas of mathematics. Knowing a variety of mathematical ideas is insufficient unless students can draw on, integrate, and use them to solve challenging complex problems. The *Navigating through Problem Solving and Reasoning* books for grades 3-6 present hands-on investigations that nurture reasoning and problem-solving strategies in each of the upper elementary grades. In lively and challenging investigations, grade 6 students have opportunities to reason about parts of a whole, analyse patterns of growth, discover area formulas for familiar shapes, explore scale factors and similar figures, and analyse a set of data to solve a real-world problem: how to arrange competitors in teams for an athletic festival. Students apply mathematical ideas from the five main content areas: number, algebra, geometry, measurement, and data analysis. As they work, they infer, generalise, reason by analogy, recognise relationships, and make representations, and they also predict, check, and revise, and verify their results. Includes a supplemental CD-ROM that features applets for students' use and resources for teachers' professional development.
