Eddie, 2013-10-10 It is usually claimed that serfs were oppressed and unfree but is this assumption true Freedom's Price building on a new reading of archival material attempts a fundamental re appraisal of the continuing orthodoxy that a serf economy embodied peasant exploitation It reveals that in fact Prussian subject peasants fared much better than their free neighbours they had mutual rights and obligations with nobles and the state In this volume Sean Eddie seeks to establish the true price of freedom paid by the peasants both in the so called Second Serfdom around 1650 and in the enfranchisement of 1807 21 Far from representing further exploitation the peasants drove a hard bargain and many nobles subsequently fared worse than their tenants subjection was abolished and land ownership was transferred from noble to peasant Capital was therefore at the centre of the pre capitalist economy and the growing economic polarization of society owed more to the peasants access to capital than to noble exploitation By locating Prussian serfdom and reforms in a pan European context and within debates about the nature of economic development feudalism and capitalism Freedom's Price targets a wider audience of early modern and modern European historians economic historians and interested general readers *Working with Smallholders* International Finance Corporation, 2018-12-05 The world's population is expected to reach 9.8 billion in 2050 Meanwhile concurrent rises in incomes and urbanization are driving increased consumption of meat dairy and biofuels Meeting the demand for food feed and biofuel will require a global production increase of almost 50 percent relative to 2012 Production in South Asia and Sub Saharan Africa where 95 percent of farms are smaller than five hectares must double at a minimum A key element of policies to increase food production will be promoting improved food quality as the health costs of too much too little and the wrong types of food become increasingly evident Additional initiatives must address how to reduce food losses globally one third of food production is lost or wasted at different stages in the food chain each year Climate change is bringing further stressors These challenges also present opportunities Around the world 450 million smallholder farmers are plagued by low productivity and poor access to inputs technology knowledge financing and markets Agribusinesses are increasingly working directly with smallholder farmers in low and middle income countries to help secure a sustainable supply of key agricultural commodities while boosting rural incomes and economic growth Sourcing directly from smallholders can expand a firm's supply base reduce margins paid to collectors and middlemen facilitate improvements in quality and yield and deliver premium prices for a certified fair trade or sustainably produced product Smallholders also

Manual Well Drilling Investment Opportunity in Ethiopia Elizabeth Weight, Robert Yoder, Andrew Keller, 2013-10-09 Increasing female and male farmers access to groundwater can contribute to increased incomes improved food security and improved access to water for livestock and domestic needs In many contexts private sector manual well drilling is a reliable and affordable means to access shallow groundwater but it is not widely available in Ethiopia Data information and mapping on pilot manual well drilling efforts in selected areas of Ethiopia indicated that the technique provided affordable access to shallow groundwater for farmers and demonstrated high demand among farmers for

manually drilled wells as well as profitability for drilling businesses The authors of this paper suggest that investments in creating a spatial database of hydrogeologic suitability domains investments in driller training and associated investments in accelerating the drilling industry could catalyze a manual well drilling industry and significantly improve smallholder farmers affordable access to shallow groundwater **Germany from Napoleon to Bismarck** Thomas Nipperdey, 2014-07-14

Thomas Nipperdey offers readers insights into the history and the culture of German nationalism bringing to light much needed information on the immediate prenational period of transition A subject of passionate debates the beginnings of German nationalism here receive a thorough going exploration from the dissolution of the Holy Roman Empire to Bismarck's division of the German speaking world into three parts an enlarged Prussian state north of the Main an isolated Austria Hungary in the south and a group of Catholic states in between This altering of power structures Nipperdey maintains was the crucial action on which the future of the German state hinged He traces the failure of German liberalism amidst the rise of nationalism turning it from a story of inevitable catastrophe toward a series of episodes filled with contingency and choice The book opens with the seismic effect of Napoleon on the German ancien régime Napoleon's modernizing hegemony is shown to have led to the gradual emergence of a civil society based on the liberal bourgeoisie Nipperdey examines the fate of this society from the revolutions of 1848-49 through the rise of Bismarck Into this story he weaves insights concerning family life working conditions agriculture industrialization and demography as well as religion learning and the arts Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Smallholder Tea Economy and Regional Development* Abdul Hannan, 2024-03-14 This book discusses the smallholder tea economy and regional development opportunities in India It first gives a conceptual overview of Plantations and Smallholders in the Tea Economy including some comparisons and examples from Smallholders tea development in Afro Asian countries like Sri Lanka Kenya Nepal Bangladesh Indonesia The spatiotemporal analysis of the growth and development of smallholders in India and its tea producing states is then analyzed in more detail with highlights on the production tea area estimated employment livelihood pattern and market structure in relation to government policies and programmes Two major tea producing states of India i.e. Assam and West Bengal are then discussed in more detail farm size land relations and trade relations between Bought Leaf Factories and Smallholders in both the states along with some bottom up development initiatives In these regions smallholders have emerged as sizable presences in the tea industry in 1990s In a next step the growth of Industrial Development Cooperative (INDCO) Tea Factories in Nilgiris of Tamil Nadu in the Post Reform period is analyzed The introduction and growth of SHG model in plantations by

Tea Board in India and their success stories as well as the policies like Tea Marketing Control Order 2003 and 2015 are examined and analyzed. The book concludes with the policy suggestions and an in depth analysis of alternatives to overcome the current crisis. Hence the book fills the research gap in the tea sector and is helpful for practitioners, policy planners, academics and University libraries, government agencies and the regulatory body like Tea Board of India. Apart from them, the book is of great help in Smallholder Tea Associations and Federations, SHGs and Cooperatives, NGOs which exist in tea supply chain and also work for the unorganised sector in India. The book is a conglomerate of information and database developed from various secondary and primary sources and illustrated through case studies. It can be a useful document for better planning, policy making and strategies for local economic development.

Swietenia macrophylla King: Ecology, silviculture and productivity Krisnawati, H., Kallio, M.H., Kanninen, M., **Anthocephalus cadamba Miq.: Ecology, silviculture and productivity** Haruni Krisnawati, Maarit Kallio, Markku Kanninen, 2011-04-01 **Private food law** Bernd van der Meulen, 2023-09-04

Since the turn of the Millennium, world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down. For the first time in legal literature, this book analyses private law initiatives relating to the food chain, often referred to as private voluntary standards or schemes. Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses. We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP, BRC, IFS, SQF and ISO. These private standards incorporate public law requirements, thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators. Other standards focus on corporate social responsibility or sustainability. This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance. It is noted that organic standards have found an interesting symbiosis with public law. Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors. Effects in terms of receiving or being denied certification far outweigh public law sanctions. In short, private law has changed an entire legal infrastructure for the food sector. It emerges as competing with the public law regulatory infrastructure. This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains and innovation.
